

AR-15 SIGHT WRENCH, A1 5 PRONG

[Gunsmith Tools & Supplies](#) > [Rifle Tools](#) > [Wrenches](#)

Two Styles, For A1 & A2, Give Fast, Convenient Sight Adjustment

Precision machined from tough, stressproof steel with square-profile fingers that grip the sight notches firmly and won't "roll out"; provides easy, exact sight adjustment. Plus, they resist bending and breaking to give years of service. Deeply drilled body fits both issue and tall blade sights. An extra-nice touch are the hex-shaped bodies; they're easy to grasp, easy to turn and won't roll off your bench. Three tools: A1 five-prong and A2 four-prong fit front and rear sights. A1/A2 is double ended to fit both five-detent A1 and four-detent, square blade, A2 front sights only. A2 wrenches also fit FN SCAR.

AR15 Sight Wrench Safety Instruction Guide

Introduction

Thank you for choosing the AR15 Sight Wrench. This tool is designed for precision adjustment of A1 and A2 front and rear sights on AR15 platforms. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

General Safety Guidelines

- Always inspect the tool before use to ensure it is in good condition and free of defects.
- Use the wrench only for its intended purpose, which is adjusting AR15 sights.
- Keep the tool out of reach of children and unauthorized users.
- Do not use the wrench if it is damaged or if any part is missing.
- Be aware of your surroundings while using the tool to prevent accidents or injuries.

Specific Safety Precautions for Use

- **Grip:** Ensure a firm grip on the wrench while adjusting the sights to prevent slipping.
- **Force:** Apply only the necessary force when adjusting sights. Excessive force can damage the tool or the sight.
- **Environment:** Use the wrench in a welllit area to enhance visibility and safety.
- **Work Surface:** Use the wrench on a stable work surface to avoid accidents.
- **Protective Gear:** Consider wearing safety glasses to protect your eyes from debris while working.

Instructions for Installation and Usage

1. Identify the Sight Type:

- Determine whether you are adjusting an A1 or A2 sight.

2. Select the Correct Wrench End:

- Use the A1 fiveprong end for A1 front sights.
- Use the A2 fourprong end for A2 front sights.

3. Position the Wrench:

- Align the prongs of the wrench with the notches on the sight.

4. Adjust the Sight:

- Turn the wrench clockwise to raise the sight or counterclockwise to lower the sight.
- Make small adjustments and check the sight alignment frequently.

5. Final Check:

- Ensure the sight is securely adjusted and properly aligned before use.

Disposal Instructions

- Dispose of the wrench in accordance with local regulations.
- If the tool is damaged or no longer needed, consider recycling it if possible.
- Do not dispose of the wrench in regular household waste.
