## **Cuts Through Toughest Bullet Jacket & Powder Fouling - Can't-Run Paste Formulation - Cushioned Abrasive Action Leaves Bores Sparkling - Won't "Eat" Stock Finishes**

The original, time-proven formula developed by Jim Brobst and produced under exclusive license. J-B has been getting burned-on, caked-in powder residue and copper jacket fouling out of gun barrels since the 1960's, and hasn't damaged an inch of rifling yet. Today, J-B once again proves itself a champion by the way it easily cleans the dirtiest, moly-fouled barrels. A unique combination of ingredients and a one-of-kind, multi-step mixing process give J-B its special characteristics. They work together to cushion the abrasive action; the soft paste liquifies as you use it, then wipes out of the bore easily. The non-embedding feature means there's no abrasive residue left behind which might keep "cutting" after you've finished cleaning. J-B has been a favorite on gunsmiths' benches for years, as a "magic" cure for customer guns that "...just won't shoot anymore". These pros know that a good scrubbing with J-B often restores accuracy. Match and varmint shooters put a lot of rounds down range, many of those using moly coated bullets. The large amounts of copper fouling and the burned-in moly can create a cleaning nightmare; J-B makes short work of it. Use J-B with the Lewis Lead Remover to get the last speck of leading out of pistol bores. Shotguns combine lead, powder and plastic fouling to really throw patterns off; J-B cleans it all out quickly and easily. Here's what a couple of the most respected names in the shooting industry have said about J-B. Jim Carmichel, gun writer and dedicated shooter, "I have used J-B for years and routinely use it even on my very finest benchrest rifles. When no other bore cleaner will get the job done, J-B will." The late Warren Page, a benchrest shooting legend, wrote the praises of J-B when it was first introduced to the shooting public. He said, " J-B is an ultra mild, abrasive oil paste, finer than jewelers' rouge, which we in the rifle accuracy shenanigan, a few years ago, found was the answer to problems of metal fouling and serious powder fouling that solvents either won't touch, or will cut only by much labor." And, "... it was quickly discovered that such an extremely fine abrasive, used with discretion, would take out caked powder residue and mild metal streaking without ruining the bore."

## **Attributes**

- Name: [BROWNELLS J-B BORE CLEANING COMPOUND 2OZ 12 PACK](#)
- Manufacturer: [BROWNELLS](#)
- Product no.: 083065012
- Mfr. No.:
- Size: 12-2 oz
- Delivery weight: 1.27kg
- Shipping height: 170mm
- Shipping width: 185mm
- Shipping length: 251mm
- UPC: 050806021549

## Safety Instruction Guide

### Introduction

Thank you for choosing JB® NonEmbedding Bore Cleaning Compound. This product is designed to effectively clean gun barrels and enhance shooting performance. Please read this safety instruction guide carefully to ensure safe and effective use of the product in compliance with the EU General Product Safety Regulation (GPSR).

### General Safety Guidelines

- Always store the product out of reach of children and pets.
- Use the product only for its intended purpose as described in the instructions.
- Avoid contact with eyes and skin. In case of contact, rinse thoroughly with water.
- Do not ingest the product. If swallowed, seek medical attention immediately.
- Ensure adequate ventilation when using the product, especially in enclosed spaces.
- Dispose of the product and its packaging responsibly, following local regulations.

### Specific Safety Precautions for Use

- Wear protective gloves and eyewear when handling the compound to prevent skin and eye irritation.
- Do not mix with other cleaning agents or chemicals, as this may cause harmful reactions.
- Use in a wellventilated area to minimize inhalation of fumes.
- Avoid prolonged exposure to the compound. Wash hands thoroughly after use.
- If you experience any adverse reactions, discontinue use and consult a medical professional.

### Instructions for Installation and Usage

#### 1. Preparation:

- Gather all necessary materials, including the JB® Bore Cleaning Compound, cleaning rod, patches, and protective gear (gloves and eyewear).
- Ensure the firearm is unloaded and pointed in a safe direction.

#### 2. Applying the Compound:

- Apply a small amount of JB® Bore Cleaning Compound to a cleaning patch or directly onto the bore.
- Insert the cleaning rod with the patch into the bore, ensuring it is properly seated.

#### 3. Cleaning Process:

- Push the cleaning rod through the bore from the chamber to the muzzle and then back again.
- Repeat the process several times to allow the compound to work effectively on fouling.

#### 4. Removing Residue:

- After cleaning, use a dry patch to remove any remaining compound from the bore.
- Inspect the bore for cleanliness. If necessary, repeat the cleaning process.

#### 5. Final Steps:

- Once satisfied with the cleanliness of the bore, apply a light coat of oil to protect against corrosion.

- Store the JB® Bore Cleaning Compound in a cool, dry place, away from direct sunlight and heat sources.

## **Disposal Instructions**

- Dispose of any unused or expired JB® Bore Cleaning Compound in accordance with local regulations for hazardous waste.
- Do not pour the product down the drain or dispose of it in regular household waste.
- Ensure that the packaging is also disposed of responsibly, recycling where possible.

## **Contact Information for Further Support**

For any inquiries regarding the use of JB® Bore Cleaning Compound or to report any concerns, please contact the manufacturer or your local distributor. Ensure you have the product details available for a more efficient response.

By following these safety instructions, you can ensure a safe and effective cleaning experience with JB® Bore Cleaning Compound. Thank you for your attention to these guidelines.
