Smaller, But Just as Good

Bigger is better right? Actually through research and development Armageddon Gear discovered that more mass equals more stability when paired with a pliable textile such as their exclusive waxed canvas. They have created the newest tool for your precision toolkit that requires less bulk and volume to achieve those game-changing results that you expect. This is not just a scaled down version of Reasor Precision's iconic shooting bag, rather the perfect blend of size and weight with new innovative fill technology extensively tested to deliver more hits on target. Ideal for rifles with the balance point somewhere between the magazine well and bipod. For use at the patent-pending "Grasping Front Support" utility or used at the butt stock for a versatile rear bag to go from 1 inch to over 6 inches of vertical adjustment for any situation. Armageddon Gear combined superior geometry with advancements in micro fills to deliver a new solution for adventure competitors, hunters, and marksmen that want to do more with less. Weight 5 lbs (heavy fill) Weight 3 lbs (light fill) 7"L x 4.5"w x 5"T Durable Waxed Canvas and Bison Leather Durable silica based, subangular mineral filler Fully sewn with single integrated leather handle Proudly made in the USA Most positional shooting bags are not filled firmly on purpose. The reason being a loose filled bag will fill in gaps, drape across obstacles, and create a more stable shooting platform than a firm filled bag.
