## An Easy Tool to Cool Down your Rifle Barrel

It's said that rifles have two enemies: rust and politicians. Well, add to that heat, because as rifle barrels heat up, they start wearing away easier, leading to more barrel swaps and more money dumped into your go-to precision gun. With the MagneToSpeed Riflekühl Barrel Cooler, that's now a thing of the past! Whether you're heading down to change targets, reloading mags or making adjustments, you'll have some down time to let your rifle barrel cool off. Speed up the process by adding in the Riflekühl barrel-cooling mechanism. This unique product slips into your rifle's chamber and pushes air down the barrel to speed up the cooling process. This efficient system brings rifle barrels down to ambient temperature in as little as 7 minutes. While the MagneToSpeed Riflekühl is working, it also filters dust as it blows air, preventing debris from being blown into your rifle barrel. The unit is powered by a single CR123A lithium battery and is small enough to fit into a pocket. As an added bonus, the bright-red body also doubles as a chamber flag, showing range officers that the gun is clear.

# Safety Instruction Guide for MagnetoSpeed Riflekühl Barrel Cooler

## Introduction

Thank you for choosing the MagnetoSpeed Riflekühl Barrel Cooler. This innovative product is designed to help you cool your rifle barrel efficiently, ensuring optimal performance and longevity. To ensure safe usage and compliance with the EU General Product Safety Regulation (GPSR), please read this safety instruction guide carefully.

## General Safety Guidelines

- Always ensure that the rifle is unloaded before using the Riflekühl Barrel Cooler.
- Keep the product out of reach of children and vulnerable individuals.
- Inspect the product for any damage before use. Do not use if damaged.
- Follow all local laws and regulations regarding the use of firearms and accessories.
- Report any unsafe product conditions or accidents to the appropriate authorities.
- Regularly check the EU Safety Gate platform for any recall updates related to this product.

## Specific Safety Precautions for Use

- Do not insert the Riflekühl Barrel Cooler into a loaded firearm.
- Ensure the rifle is pointed in a safe direction when using the cooler.
- Avoid using the product in wet or damp conditions to prevent electrical issues.
- Do not attempt to modify or repair the Riflekühl Barrel Cooler.
- Use only the specified CR123A lithium battery for power; do not mix with other battery types.
- Be cautious of the air flow; do not obstruct the barrel while the cooler is in operation.

## Instructions for Installation and Usage

### 1. Preparation

- Ensure the rifle is unloaded and in a safe position.
- Gather the necessary tools (if any) for installation.

### 2. Installation

- Gently insert the Riflekühl Barrel Cooler into the rifle's chamber.
- Ensure it is seated properly and securely.

### 3. Operation

- Activate the cooler by pressing the power button.
- The cooler will push air down the barrel, effectively cooling it.
- Monitor the cooling process; it may take as little as 7 minutes to reach ambient temperature.

### 4. PostUse

- Once the cooling process is complete, turn off the cooler.
- Carefully remove the Riflekühl Barrel Cooler from the chamber.
- Clean any dust or debris that may have accumulated during use.

## **Disposal Instructions**

- Dispose of the Riflekühl Barrel Cooler responsibly in accordance with local regulations.
- Remove the battery before disposal and recycle it according to local battery recycling programs.
- Do not dispose of the product in household waste.

## **Contact Information for Further Support**

For any questions or concerns regarding the MagnetoSpeed Riflekühl Barrel Cooler, please refer to the product packaging or your retailer for contact information.

Thank you for your attention to these safety instructions. Enjoy using your MagnetoSpeed Riflekühl Barrel Cooler responsibly and safely.
