

TAPS SYNC SUREFIRE/LASER 9" FDE VARIANT 1

[Shooting Accessories](#) > [Flashlights & Accessories](#) > [Flashlight Accessories](#)

TAPS (Tactical Augmented Pressure Switch) from TNVC and Unity Tactical is a complete one point command and control system for all weapon-mounted electronics. It provides low profile, dual-device control for lights and lasers. TAPS mounts directly to any industry standard rail, including M1913 Picatinny, KEYMOD, and M-LOK. No third party rail adapters are needed, keeping the weapon lighter and sleeker. It features two on-board buttons and two accessory leads. Available in 4 button configurations, TAPS SYNC utilizes a patented double pole dome switch to fire both devices simultaneously on isolated circuits to protect your devices. This TAPS switch comes standard with a Surefire Light lead and MIL-Standard / Crane Laser Lead that fits NATO standard lasers from Insight Technology, Steiner, B.E. Meyers, and others. TAPS is waterproof to 1 meter for 30 minutes when properly installed on a rail, and features more durable buttons than many competing pressure switches on the market. Its hardened housing will keep TAPS standing up to the rigors of the battlefield. TAPS SYNC allows the user to fire two devices simultaneously with one button, and is available in 4 button variations: Variant 1 - Button1: Light | Button2: Light + Laser Variant 2 - Button1: Laser | Button2: Light + Laser Variant 3 - Button1: Light + Laser | Button2: Light Variant 4 - Button1: Light + Laser | Button2: Laser Note: the dual-function SYNC button requires a slightly higher activation force than the standard single device button.

Mode(s): Momentary Only Weight: 2.25oz w/hardware Waterproof: 1 meter for 30 minutes

Attributes

- Name: [TAPS SYNC SUREFIRE/LASER 9" FDE VARIANT 1](#)
- Manufacturer: [UNITY TACTICAL](#)
- Product no.: 100043397
- Mfr. No.: TAPE-SI9F
- Color: Flat Dark Earth
- Delivery weight: 0.091kg
- Shipping height: 25mm
- Shipping width: 127mm
- Shipping length: 178mm

TAPS SYNC Surefire/Laser 9" FDE Variant 1 Safety Instructions

Introduction

Thank you for choosing the TAPS SYNC Surefire/Laser 9" FDE Variant 1. This product is designed to enhance your tactical operations by providing a reliable command and control system for weaponmounted electronics. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

General Safety Guidelines

- Ensure safe use of the TAPS SYNC by following these guidelines:
 - Always check the product for any visible damage before use.
 - Ensure that the product is installed correctly on the weapon rail.
 - Follow all manufacturer instructions for installation and usage.
 - Keep the product out of reach of children and vulnerable individuals.
 - Use the product only for its intended purpose as described in the manual.
 - Regularly inspect the product for wear and tear, especially the buttons and housing.
 - Report any unsafe products or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- Before using the TAPS SYNC, please consider the following safety precautions:
 - **Waterproofing:** The TAPS SYNC is waterproof to 1 meter for 30 minutes when properly installed. Do not exceed this limit.
 - **Activation Force:** The dualfunction SYNC button requires a slightly higher activation force than the standard single device button. Ensure you are familiar with the activation force needed for safe operation.
 - **Button Configuration:** Be aware of the button configuration you are using to avoid accidental activation of both devices.
 - **Device Compatibility:** Ensure that the devices you are connecting (lights and lasers) are compatible with the TAPS SYNC to avoid damage.
 - **Environmental Conditions:** Avoid using the product in extreme weather conditions that may affect its performance.

Instructions for Installation and Usage

- Follow these steps for proper installation and usage of the TAPS SYNC:

1. Installation:

- Mount the TAPS SYNC directly onto any industrystandard rail (M1913 Picatinny, KEYMOD, or MLOK).
- Ensure that no thirdparty rail adapters are used to maintain a lighter and sleeker weapon setup.
- Verify that the mount is secure and does not wobble.

2. Connecting Devices:

- Connect the Surefire Light lead and MILStandard / Crane Laser Lead to the respective devices.
- Ensure that all connections are secure and correctly aligned.

3. Using the TAPS SYNC:

- Familiarize yourself with the button configurations:
- **Variant 1:** Button1 Light | Button2 Light + Laser
- **Variant 2:** Button1 Laser | Button2 Light + Laser
- **Variant 3:** Button1 Light + Laser | Button2 Light
- **Variant 4:** Button1 Light + Laser | Button2 Laser
- Test the operation of each button to ensure proper functionality before field use.

Disposal Instructions

- Proper disposal of the TAPS SYNC is important for environmental safety:
 - Do not dispose of the product in regular household waste.
 - Follow local regulations for electronic waste disposal.
 - If you are unsure about disposal methods, contact your local waste management authority for guidance.

Contact Information for Further Support

- For any inquiries related to safety or product support, please refer to the manufacturer's contact details provided in the product packaging or on the official website.

Thank you for your attention to these safety instructions. Your safety and the effective use of the TAPS SYNC are our top priorities.
