Safety Instruction Guide for PRECISION INSTRUMENT SCREWDRIVERS FRIEDR. DICK GMBH INSTRUMENT SCREWDRIVER SET, ALUMINUM HANDLE

Introduction

Thank you for choosing the PRECISION INSTRUMENT SCREWDRIVERS by FRIEDR. DICK GMBH. This guide provides essential safety instructions to ensure the safe and effective use of your screwdriver set. Please read this manual thoroughly before using the product.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose, which is handling small screws, particularly in precision instruments.
- Always inspect the screwdrivers for any signs of damage or wear before use. Do not use damaged tools.
- Keep the screwdrivers out of reach of children to prevent accidents and injuries.
- Use the screwdrivers in a welllit area to ensure visibility and reduce the risk of accidents.
- Follow all local regulations regarding tool use and safety.

Specific Safety Precautions for Use

- Always select the correct size screwdriver to match the screw you are working with. Using the wrong size can damage screws and tools.
- When using the screwdrivers, maintain a firm grip on the handle to avoid slipping.
- Avoid applying excessive force when turning screws to prevent stripping or breaking the screws.
- Be cautious of sharp edges on the blades; handle them with care to avoid cuts.
- Do not use the screwdrivers for prying or as a lever, as this can lead to tool damage and personal injury.
- If you notice any unusual behavior from the screwdrivers during use (e.g., slipping blades, excessive wear), stop using them immediately and assess the situation.

Instructions for Installation and Usage

• Using the Screwdrivers:

1. Select the appropriate screwdriver blade for the screw you intend to work with.
2. Insert the blade into the chuck of the handle until it is firmly seated.
3. Ensure the blade is secure before use.
4. Position the screwdriver tip in the screw head and turn gently to engage.
5. Turn the handle clockwise to tighten or counterclockwise to loosen the screw.
6. If resistance is felt, stop and reassess the fit of the screwdriver and screw.

• Replacing Blades:

1. To replace a blade, hold the screwdriver handle securely.
2. Release the current blade from the chuck by following the manufacturer's instructions.
3. Insert the new blade into the chuck and ensure it is locked in place.

• Cleaning and Maintenance:

- Clean the screwdrivers after each use with a soft cloth to remove debris and moisture.

- Store the screwdrivers in a dry place, preferably in the hinged wooden case provided, to protect them from damage.
- Regularly check the condition of the blades and handles for any signs of wear or damage.

Disposal Instructions

- Dispose of the screwdriver set in accordance with local regulations concerning electronic and metal waste.
- If the screwdrivers are damaged beyond repair, they should not be placed in regular household waste. Instead, take them to a designated recycling facility.

Contact Information for Further Support

For any inquiries regarding product safety or if you encounter any issues, please refer to the relevant support resources available in your region. It is important to stay informed about any safety recalls or updates concerning your product.

Thank you for your attention to these safety guidelines. Your safety and satisfaction are our top priorities. Enjoy using your PRECISION INSTRUMENT SCREWDRIVERS!
