

SACK POUCH MK3 - SPIRITUS SYSTEMS SACK POUCH MK3, COYOTE BROWN

[Shooting Accessories](#) > [Duty Gear](#) > [Pouches](#)

The Sub Abdominal Carrying Kit or "SACK" is the most versatile tactical "fanny pack" on the market. It was designed to make critical equipment easy to access from both sides or when in a confined space like a vehicle. The pouch features a half zip design, which means that your equipment will not easily fall out of the pouch even if the zipper is left unsecured. The front of the pouch features a small zippered stash pocket that is perfect for easy access to small items. The bottom of the pouch features two elastic loops that can be adjusted to hold a tourniquet or other equipment that you may need to rapidly deploy. If bottom carry doesn't fit your mission needs, you can easily remove and reinstall the loops as necessary. The inside features soft loop Velcro on both sides. This makes the pouch very dynamic, giving you the ability to use our Velcro Insert Suite to fit your requirements. It also features two slide-locks that make it easy to adjust the tension of the elastic loops hanging below, as well as two tie-down loops for securing sensitive equipment. The two grommet holes on the bottom aid with drainage of the pouch, if submersion occurs. The SACK is designed to fit onto the bottom of Spiritus Systems Micro Fight Chest Rig, or any other plate carrier or rig that accommodates standard hook and loop, making it a versatile choice for those changing load-outs often. Simply pull this off one kit and add it to another. Velcro Attachment measures 7"x 4"
