

ELASTIC HOOK & LOOP CUMMERBUND - SPIRITUS SYSTEMS

ELASTIC HOOK & LOOP CUMMERBUND (SIZE 2) - MULTICAM BLACK

[Home](#)

Assault Panel Core The Assault Panel Core was designed to be a multi-mission back panel attachment to your LV-119 OVERT Rear Plate Bag. We designed the Panel to fill a spectrum of needs ranging from a light weight Assault Panel, to a more robust Pack Panel. The panel is both expandable and modular and can accommodate a plethora of equipment to meet almost any operational need. The Assault Panel Core attaches to your LV-119 Rear Plate Bag using a combination of 6 directional snaps, and 2 full length zippers. It also utilizes two stabilizers that route inside of the Rear Plate Bag if the Panel is used in "Configuration 2 or 3" listed below. The Panel has a removable flap system that allows the user to configure the upper half of the Panel to meet their mission needs. (Flaps are sold separately, the Assault Panel Core does NOT come with a flap.) This eliminates the need to have multiple panels and allows for quicker donning and doffing of mission essential equipment. NOTE: This LV/119 Cummerbund is designed for use with a front and rear LV/119 plate bag. The 5-Inch Elastic Cummerbund is a simple and effective solution for professionals who need to carry and have rapid access to additional ammunition and equipment on their sides while still maintaining a low profile. Side loading is great for ground vehicle and low visibility operations. Elastic cells are 3 inches wide and are built around standard 5.56 Magazines, such as the PMAG. Elastic cummerbunds prevent user fatigue while worn for long durations, as they stretch with the body during active maneuvers. By using 5-Inch Elastic, we allow for the stable carriage of taller items as they are held more securely. The sewn-on pull tabs allow for the use of the Bungee Retention Kit to securely hold items for HALO, OTB, or other kinetic operations. The tabs also allow users to pull on the cell and make it easier to load and extract equipment. The Elastic Hook & Loop Cummerbund features premium, Berry Amendment Compliant materials sourced from industry leaders in textiles manufacturing. It offers superior construction processes, including triple stitching on the elastic cells to prolong life and prevent cell failure when stuffed with non standard or oddly shaped items. Cummerbund Attachment The cummerbund attachment is a proprietary system that allows for the use of all of Spiritus Systems cummerbunds, as well as allowing for a wide range of adjustment. The cummerbund attaches inside the plate bag, which is advantageous for a few reasons. There is no external mounting that can get snagged or rip off when exiting vehicles in haste. The design creates a smooth profile when worn underneath clothing. Hook & Loop is not utilized as an attachment method on the rear plate bag. Hook & Loop wears out over time and is a generally less-than-optimal attachment method when not supported in other ways. Hook & Loop doesn't handle weight well and it sticks to everything, especially cloth seats. SIZING The cummerbund comes in two sizes: Size 1 and Size 2, each offering up to 14 inches of total adjustment. This allows for a proper fitment for all body types. To figure our appropriate sizing, take measurement of the waist at the belly button. When measuring, users should dress as they would while actually wearing the carrier. For example, if the user is operating in arctic environments, they should be wearing cold weather equipment when measuring. Size 1: 28" to 42" Size 2: 40" to 54" SOLD AS A SET. If your waist measurement is 42", we suggest going up to the Size 2 cummerbund. NOTE: The LV119 Cummerbund is part of the LV119 Plate Carrier System. This item does not include a Front Plate Bag, Rear Plate Bag,

Shoulder Covers, Placards, or any other accessories. Additional components are required for proper use. Some images shown with optional accessories, sold separately.

Attributes

- Name: [SPIRITUS SYSTEMS ELASTIC HOOK & LOOP CUMMERBUND \(SIZE 2\) - MULTICAM BLACK](#)
- Manufacturer: [SPIRITUS SYSTEMS](#)
- Product no.: 430101901

Safety Instruction Guide for ELASTIC HOOK & LOOP CUMMERBUND

Introduction

Thank you for choosing the ELASTIC HOOK & LOOP CUMMERBUND by Spiritus Systems. This safety instruction guide provides essential information to ensure the safe and effective use of the cummerbund. Please read this guide carefully before use.

General Safety Guidelines

- Ensure that the cummerbund is used only for its intended purpose as described in the product specifications.
- Regularly inspect the cummerbund for signs of wear or damage. Do not use if any component is compromised.
- Always follow the sizing guidelines to ensure a proper fit. An improper fit may lead to discomfort or ineffective performance.
- Store the cummerbund in a dry and cool environment to maintain material integrity.
- Keep the cummerbund out of reach of children and vulnerable individuals when not in use.

Specific Safety Precautions for Use

- When using the cummerbund, ensure that it is securely fastened to prevent accidental detachment during use.
- Avoid overloading the elastic cells with items that exceed their designed capacity, as this may lead to failure.
- Be cautious while operating in low visibility conditions. Make sure the cummerbund does not snag on equipment or surroundings.
- If using the cummerbund in conjunction with other tactical gear, ensure compatibility to avoid hazards.
- Users should dress appropriately for the environment in which the cummerbund is being used (e.g., wear cold weather gear in arctic conditions).

Instructions for Installation and Usage

1. Sizing

- Measure your waist at the belly button level while wearing typical clothing.
- Refer to the following size guidelines:
 - Size 1: 28" to 42"
 - Size 2: 40" to 54"
- If your waist measurement is at the upper limit of Size 1, consider moving to Size 2 for optimal fit.

2. Attachment

- Attach the cummerbund inside the LV119 Rear Plate Bag using the proprietary attachment system.
- Ensure the cummerbund is fully engaged with the attachment points to prevent accidental detachment.

3. Configuration

- Configure the cummerbund based on your operational needs by adjusting the elastic cells and stabilizers.
- Utilize the removable flap system if required (flaps sold separately).

4. Loading

- Load items into the elastic cells with care, ensuring they are compatible with the 5.56 magazine sizing.
- Use the sewnon pull tabs to assist with loading and extracting equipment.

5. Donning and Doffing

- To put on the cummerbund, secure it around the waist and adjust for comfort.
- To remove, carefully unfasten the attachment points and slide the cummerbund off.

Disposal Instructions

- Dispose of the cummerbund in accordance with local regulations regarding textile waste.
- If the cummerbund is damaged beyond repair, consider recycling options if available.

Contact Information for Further Support

For any safety inquiries or further assistance regarding the ELASTIC HOOK & LOOP CUMMERBUND, please contact the designated EU contact point for Spiritus Systems.

Conclusion

The ELASTIC HOOK & LOOP CUMMERBUND is designed to provide secure and effective support for your tactical needs. By following these safety instructions, you can ensure safe usage and prolong the life of your product. Always stay informed about product recalls and safety updates through the EU Safety Gate platform. Thank you for your attention to these important safety guidelines.
