The Align Tactical™ OFFSET EXTENDED MAGAZINE RELEASE allows the operator to rest their middle finger flush across the lower half of where the Sig Sauer® P365® factory magazine release's triangular bottom edge would be for increased recoil control. Ergonomically designed with an enhanced and extended engagement surface closer to the thumb, for minimizing/eliminating pistol shifting in-hand when reaching to eject magazines. Higher Grip for Recoil Control Obtain the highest grip with an unobstructed undercut that allows natural finger placement, thereby reducing muzzle flip to return the sights back to target quicker for a competitive edge. Enhanced Ergonomics Eliminate side-finger chafing when choking up high on the pistol grip. The OFFSET design allows resting the middle finger flush across the lower half of where the factory magazine release's triangular bottom corner edge would be. Reduced Reach Increased leverage helps maintain a firing grip without having to shift the pistol in-hand during reloads. An enlarged button surface protrudes farther and is relocated higher up the grip frame to provide positive engagement while reducing thumb travel. \*Holsters that cover the magazine release may require minor relief for use Align Tactical's OFFSET Extended Magazine Release is compatible with Sig Sauer® MICRO-COMPACT P365®, P365X®, and P365XL® Series, Icarus Precision, Mischief Machine, and Wilson Combat® WCP365 grip modules in 9/.380.
