

OTB OVERT FRONT PLATE BAG - SPIRITUS SYSTEMS OTB LV-119

FRONT OVERT PLATE BAG (LARGE) - RANGER GREEN

[Home](#)

OTB OVERT Front Plate Bag The LV/119 System The LV/119 SYSTEM is a family of products that work together to give end-users the ability to scale their equipment to their current needs. The fact that this is a cohesive system means that end-users are able to mix and match accessories in most cases. For example: One could take a C O V E R T Front or Rear Plate bag and use it with an O V E R T Front and Rear Plate Bag. Users may cross pollinate cummerbunds, shoulder covers, and other pieces of the system. The SYSTEM encompasses many parts, some of which are currently available and some that are in development. These include Back Panels of various types, MOLLE cummerbunds, First Spear TUBES™ integrations, and different placards. Over The Beach Operations Over The Beach Operations are some of the most challenging and miserable operations that service members must endure. We are proud to bring a suite of products that directly results in improved load carriage and soldier survival during sea borne operations. The OTB product line is built with a mesh material, which allows for quick drainage of water and sea borne debris such a sand. OTB products will dry faster after exiting the water and will drain water faster and more efficiently as well. The mesh also makes the products simple to clean using fresh water after conducting operations in salt environments. The Over The Beach (OTB) O V E R T shares the same profile as the C O V E R T and O V E R T plate bags but with modifications that make it more suitable for seaborne operations. Most noticeable the bags are made primarily of a hydrophobic mesh material. The front bag features a 3 Row / 4 Column MOLLE field that doubles as a 6" x 3" Velcro Field. This may be used to attach End User Devices (EUDs), such as those made by KAGWERKS or Juggernaut Defense. The Velcro may be used to mount placards, patches, and IR identifiers. The MOLLE can also be used to mount administrative pouches, frag grenade pouches, or Personal Floatation Devices. Every front plate bag comes standard with sewn loops on the sides for attaching First Spear TUBES™ for use with our MOLLE TUBES™ Cummerbund. Placard and Chest Rig Integration. All LV/119 Plate Bags offer placard and chest rig integration via removable 1-Inch ITW NEXUS Buckles. These clips are removable, allowing users to reduce the signature of the plate bag if it is being worn under a cover shirt or being utilized in a low-profile role. The OTB series of products offers a specific OTB Placard that can button into the front bag for added security when jumping into the water. The OTB plate bag is still compatible with our normal placard offerings as well as the Micro Fight Chest Rig Chassis. Push To Talk Support. Each O V E R T front plate bag comes standard with a PTT/Porkchop Loop on either side. Communication Cable Routing. The Modern Warfighter and Law Enforcement Officer has a radio. To date, the majority of manufacturers have not taken end-user communications needs in to their design considerations - we endeavor to break that paradigm. The O V E R T front bag offers open shoulders to facilitate commo cable routing inside the plate bags and over the shoulders. It also offers small routing points by the 1-Inch ITW NEXUS buckles on the chest - easily accommodating PTT cable routing. Plate Fitment. The carrier was designed to fit United States Standard Issue SAPI cut plates, but it will fit other cuts as well as long as they fit within the specifications listed below. The bags were built to accommodate "thicker" plates, but they will not fit plates do not fall within the measurements listed. Medium -10" x 12.5" Large - 10.25" x

OTB OVERT Front Plate Bag Safety Instructions

Introduction

Thank you for choosing the OTB OVERT Front Plate Bag by Spiritus Systems. This product is designed to enhance your operational capabilities while ensuring your safety. Please read this safety instruction guide carefully to understand how to use, install, and dispose of the product safely.

General Safety Guidelines

- **Product Safety:** This product is designed to be safe for use in various environments. However, improper use can lead to injury.
- **Enhanced Recalls:** In the event of a product recall, you will be notified through standardized notices. Please be aware of any updates regarding the safety of this product.
- **Online Shopping:** If purchased online, ensure that the retailer complies with safety regulations similar to those in physical stores.
- **Special Consumer Focus:** This product is not designed for use by children. Keep it out of reach of minors.
- **EU Contact Point:** For any safety inquiries, please refer to the designated EU contact point for this product.
- **Rapid Alerts:** Stay informed about product safety updates through the EU's Safety Gate platform.

Specific Safety Precautions for Use

- **Avoid Excessive Weight:** Do not overload the plate bag beyond its intended capacity. This may affect your mobility and safety.
- **Check for Damage:** Before each use, inspect the plate bag for any signs of wear or damage. Do not use if damaged.
- **Proper Fit:** Ensure that the bag fits securely and comfortably on your body. An improper fit can lead to injury during use.
- **Hydrophobic Material:** The bag is made from hydrophobic mesh material. While it is designed for quick drainage, do not expose it to excessive water if not necessary.
- **Communication Equipment:** When using communication devices, ensure that cables are routed properly to avoid entanglement.

Instructions for Installation and Usage

1. Fitting the Plate Bag:

- Adjust the shoulder straps to ensure a snug fit.
- Secure the cummerbund if applicable, ensuring it is not too tight or too loose.

2. Attaching Accessories:

- Use the MOLLE field on the front of the bag to attach pouches or other accessories.
- Ensure that any Velcro attachments are securely fastened.

3. Communication Cable Routing:

- Route communication cables through the open shoulder areas.
- Check that the cables do not interfere with your movement or pose a safety hazard.

4. Using the PTT Loop:

- Attach your Push To Talk (PTT) device to the designated loop on either side of the bag.
- Ensure that the PTT device is secure and accessible during use.

5. **Maintenance:**

- After use in saltwater environments, rinse the bag with fresh water to remove salt and debris.
- Allow the bag to dry completely before storage.

Disposal Instructions

- **Environmental Considerations:** Dispose of the product responsibly. Do not throw it in regular trash.
- **Recycling:** Check local regulations for recycling options specific to materials used in the product.
- **Hazardous Materials:** If the product shows signs of wear and contains components that may be hazardous, follow local guidelines for hazardous waste disposal.

Contact Information for Further Support

For more information or assistance regarding the OTB OVERT Front Plate Bag, please refer to the designated contact point provided with your product.

Thank you for prioritizing your safety and the safety of others while using the OTB OVERT Front Plate Bag. Please keep this guide for future reference.
