OTB OVERT Front Plate Bag The LV/119 System The LV/119 SYSTEM is a family of products that work together to give end-users the ability to scale their equipment to their current needs. The fact that this is a cohesive system means that end-users are able to mix and match accessories in most cases. For example: One could take a C O V E R T Front or Rear Plate bag and use it with an O V E R T Front and Rear Plate Bag. Users may cross pollinate cummerbunds, shoulder covers, and other pieces of the system. The SYSTEM encompasses many parts, some of which are currently available and some that are in development. These include Back Panels of various types, MOLLE cummerbunds, First Spear TUBES™ integrations, and different placards. Over The Beach Operations Over The Beach Operations are some of the most challenging and miserable operations that service members must endure. We are proud to bring a suite of products that directly results in improved load carriage and soldier survival during sea borne operations. The OTB product line is built with a mesh material, which allows for quick drainage of water and sea borne debris such a sand. OTB products will dry faster after exiting the water and will drain water faster and more efficiently as well. The mesh also makes the products simple to clean using fresh water after conducting operations in salt environments. The Over The Beach (OTB) O V E R T shares the same profile as the C O V E R T and O V E R T plate bags but with modifications that make it more suitable for seaborne operations. Most noticeable the bags are made primarily of a hydrophobic mesh material. The front bag features a 3 Row / 4 Column MOLLE field that doubles as a 6" x 3" Velcro Field. This may be used to attach End User Devices (EUDs), such as those made by KAGWERKS or Juggernaut Defense. The Velcro may be used to mount placards, patches, and IR identifiers. The MOLLE can also be used to mount administrative pouches, frag grenade pouches, or Personal Floatation Devices. Every front plate bag comes standard with sewn loops on the sides for attaching First Spear TUBES™ for use with our MOLLE TUBES™ Cummerbund. Placard and Chest Rig Integration. All LV/119 Plate Bags offer placard and chest rig integration via removable 1-Inch ITW NEXUS Buckles. These clips are removable, allowing users to reduce the signature of the plate bag if it is being worn under a cover shirt or being utilized in a low-profile role. The OTB series of products offers a specific OTB Placard that can button into the front bag for added security when jumping into the water. The OTB plate bag is still compatible with our normal placard offerings as well as the Micro Fight Chest Rig Chassis. Push To Talk Support. Each O V E R T front plate bag comes standard with a PTT/Porkchop Loop on either side. Communication Cable Routing. The Modern Warfighter and Law Enforcement Officer has a radio. To date, the majority of manufacturers have not taken end-user communications needs in to their design considerations - we endeavor to break that paradigm. The O V E R T front bag offers open shoulders to facilitate commo cable routing inside the plate bags and over the shoulders. It also offers small routing points by the 1-Inch ITW NEXUS buckles on the chest - easily accommodating PTT cable routing. Plate Fitment. The carrier was designed to fit United States Standard Issue SAPI cut plates, but it will fit other cuts as well as long as they fit within the specifications listed below. The bags were built to accommodate "thicker" plates, but they will not fit plates do not fall within the measurements listed. Medium -10" x 12.5" Large - 10.25" x

OTB OVERT Front Plate Bag Safety Instructions

Introduction

Thank you for choosing the OTB OVERT Front Plate Bag. This guide provides essential safety instructions to ensure the safe and effective use of your product. Please read this manual carefully before use to understand the safety precautions, installation instructions, and proper usage guidelines.

General Safety Guidelines

- **Product Safety:** Ensure safe use of the OTB OVERT Front Plate Bag by following all instructions provided in this manual.
- **Enhanced Recalls:** Stay informed about product recalls. Regularly check for updates from authorities regarding any safety issues.
- **Online Shopping:** When purchasing online, ensure the platform complies with safety standards similar to physical stores.
- **Special Consumer Focus:** Extra care should be taken when the product is used by vulnerable groups, including children.
- **EU Contact Point:** For any safety inquiries, please refer to the designated EU contact point associated with this product.
- **Rapid Alerts:** Be aware of the Safety Gate system for quick updates on unsafe products.

Specific Safety Precautions for Use

- **Inspect Before Use:** Always inspect the plate bag for any signs of damage or wear before use. Do not use if damaged.
- **Proper Fit:** Ensure that your body armor plates fit securely within the bag's dimensions. Refer to the specifications provided for proper fitment.
- **Weight Considerations:** Be aware of the weight of the loaded bag. Ensure it is manageable and does not impede your mobility.
- **Hydrophobic Material:** The bag is made from hydrophobic mesh material. While it allows for quick drainage, do not expose it to extreme conditions for prolonged periods.
- **Communication Equipment:** Ensure that communication cables are properly routed to avoid snagging or damage during use.
- **Secure Attachments:** Ensure all accessories and attachments are securely fastened to prevent accidental detachment during use.

Instructions for Installation and Usage

1. Fitting the Plates:

- Open the front compartment of the OTB OVERT Front Plate Bag.
- Place the plate in the designated compartment, ensuring it fits securely.
- Close the compartment, ensuring it is properly secured.

2. Attaching Accessories:

- Use the MOLLE fields to attach pouches and accessories as needed.
- Ensure that all attachments are securely fastened and do not obstruct movement.

3. Adjusting for Comfort:

- Adjust the shoulder straps and cummerbund for a comfortable fit.
- Ensure that the bag is snug but not overly tight to allow for proper movement.

4. **Communication Setup:**

- Route communication cables through the open shoulders and small routing points as necessary.
- Ensure that cables are not pinched or at risk of damage.

5. **Using the PTT/Porkchop Loop:**

- Attach your Push To Talk (PTT) device to the designated loop on either side of the bag.
- Ensure it is easily accessible during use.

Disposal Instructions

- **EndofLife Disposal:** Dispose of the OTB OVERT Front Plate Bag responsibly at the end of its life cycle. Do not dispose of it in regular household waste.
- **Recycling:** Check local regulations for recycling options specific to militarygrade materials.
- **Hazardous Components:** If the product contains any hazardous components, ensure they are disposed of according to local hazardous waste regulations.
