

NECK TENSION GAGE TOOL - FORSTER PRODUCTS, INC. 270 CALIBER NECK TENSION GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

Use the Neck Tension Gage (NTG) as an inspection tool to quickly and accurately screen/sort a batch of brass before your bullet seating operation. The NTG provides reloaders with the information needed to create exacting neck tensions during the bullet seating operation. Use after case neck sizing and before bullet seating to help determine optimal inside neck diameter for consistent release of a bullet from your reloaded rounds. Allows for inspection of the inside diameters of case necks to be sure a "donut" has not formed at the neck-shoulder junction. Available in five calibers, the NTG Neck Tension Gage Inspection Tool consists of four stepped diameters that increase in size until reaching the handle. Each diameter is etched on the metal tool. Simply insert the stepped end of the tool into the neck of your sized case, sliding it in until one of the diameters achieves a slip fit in the case neck. Use the resulting value to fine-tune your case preparation. Kit comes with all 5 calibers.

NECK TENSION GAGE TOOL SAFETY INSTRUCTIONS

Introduction

Thank you for choosing the Neck Tension Gage (NTG) Tool from Forster Products, Inc. This tool is designed to assist reloaders in ensuring optimal neck tension during bullet seating operations. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

General Safety Guidelines

- Always use the NTG Tool in accordance with the manufacturer's instructions.
- Keep the tool out of reach of children and vulnerable individuals to prevent accidental injury.
- Inspect the NTG Tool before each use for any signs of damage or wear. Do not use if damaged.
- Store the tool in a safe and dry place when not in use.
- Report any unsafe conditions or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- Ensure you are wearing appropriate personal protective equipment (PPE), such as safety glasses, when using the tool.
- Do not apply excessive force when inserting the tool into the case neck to avoid damaging the tool or the brass case.
- Use the NTG Tool only for its intended purpose – inspecting neck tensions in brass cases.
- Be aware of your surroundings and ensure you have adequate lighting when using the tool.

Instructions for Installation and Usage

1. Preparation:

- Ensure that the brass cases have been properly sized before using the NTG Tool.
- Gather the necessary components, including the NTG Tool and the brass cases to be inspected.

2. Using the NTG Tool:

- Identify the stepped end of the NTG Tool.
- Insert the stepped end into the neck of the sized case.
- Slide the tool into the neck until one of the diameters achieves a slip fit.
- Note the diameter that fits snugly to determine the optimal inside neck diameter for consistent bullet release.

3. PostUsage:

- Clean the NTG Tool after each use to maintain its accuracy and longevity.
- Store the tool in its designated case or a safe location to prevent damage.

Disposal Instructions

- Dispose of the NTG Tool in accordance with local regulations for metal and tool disposal.
- Do not dispose of the tool in regular household waste.
- If the tool is damaged beyond repair, consider recycling the metal components if possible.

Contact Information for Further Support

For any inquiries regarding safety or usage of the NTG Tool, please refer to the manufacturer's contact information found on the product packaging or the official website.

By following these safety instructions, you can ensure a safe and effective experience with the Neck Tension Gage Tool. Thank you for prioritizing safety in your reloading operations.
