

NECK TENSION GAGE TOOL - FORSTER PRODUCTS, INC. 338 CALIBER NECK TENSION GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

Use the Neck Tension Gage (NTG) as an inspection tool to quickly and accurately screen/sort a batch of brass before your bullet seating operation. The NTG provides reloaders with the information needed to create exacting neck tensions during the bullet seating operation. Use after case neck sizing and before bullet seating to help determine optimal inside neck diameter for consistent release of a bullet from your reloaded rounds. Allows for inspection of the inside diameters of case necks to be sure a "donut" has not formed at the neck-shoulder junction. Available in five calibers, the NTG Neck Tension Gage Inspection Tool consists of four stepped diameters that increase in size until reaching the handle. Each diameter is etched on the metal tool. Simply insert the stepped end of the tool into the neck of your sized case, sliding it in until one of the diameters achieves a slip fit in the case neck. Use the resulting value to fine-tune your case preparation. Kit comes with all 5 calibers.

Neck Tension Gage Tool Safety Instruction Guide

Introduction

Thank you for choosing the NECK TENSION GAGE TOOL by Forster Products, Inc. This tool is designed to assist reloaders in achieving precise neck tensions during bullet seating operations. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

General Safety Guidelines

- Ensure safe use of the Neck Tension Gage Tool by following these guidelines:
 - Always use the tool as intended and according to the provided instructions.
 - Keep the tool out of reach of children and vulnerable individuals.
 - Inspect the tool before each use to ensure it is free from damage or defects.
 - Do not use the tool if it shows signs of wear or damage.
 - Report any unsafe conditions or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- When using the Neck Tension Gage Tool, please observe the following precautions:
 - Use the tool only with properly sized cases to avoid inaccurate readings.
 - Do not force the tool into the case neck; it should fit smoothly.
 - Avoid using the tool near flammable materials or in unsafe environments.
 - Wear appropriate personal protective equipment, such as safety glasses, when using the tool.
 - Do not modify or alter the tool in any way.

Instructions for Installation and Usage

- Follow these steps for proper installation and usage of the Neck Tension Gage Tool:

1. Preparation:

- Ensure your brass has been properly sized before using the tool.
- Clean the tool to remove any debris or contaminants.

2. Using the Tool:

- Hold the tool by the handle, ensuring a firm grip.
- Insert the stepped end of the tool into the neck of the sized case.
- Slide the tool in until one of the diameters achieves a slip fit in the case neck.
- Take note of the diameter that fits; this will help you finetune your case preparation.

3. PostUse:

- Clean the tool after each use to maintain its accuracy and longevity.
- Store the tool in a dry, safe place away from children.

Disposal Instructions

- When it comes time to dispose of the Neck Tension Gage Tool:
 - Check local regulations for proper disposal methods.
 - If the tool is damaged and cannot be reused, dispose of it in accordance with local waste management guidelines.

- Do not throw the tool in regular household waste if it contains hazardous materials.

Contact Information for Further Support

- For any questions or concerns regarding the Neck Tension Gage Tool, please reach out to the designated EU contact point provided with your product packaging.

Conclusion

By following this safety instruction guide, you can ensure the safe and effective use of the NECK TENSION GAGE TOOL. For any further information or inquiries, please refer to the contact details provided with your product. Thank you for prioritizing safety in your reloading activities.
