

# PARACORD GUIDE FOR SLING ATTACHMENT - Edgar Sherman Design PARACORD GUIDE ATTACHMENT FOR ESD SLINGS, BLACK

[Shooting Accessories](#) > [Slings & Sling Swivels](#) > [Tactical Sling Mounts](#)

Using paracord to connect your sling to a firearm is a lightweight, durable, quiet, field maintainable, repairable, modular, and affordable method. The main downside experienced with this method is that the overhand knot used to tie the paracord is bulky, often untucks from under the sling, gets caught in certain gaps on your stock, and when exposed from under the sling can untie over time. ESD set out to solve these problems and in doing so designed the ESD paracord guide. The ESD Paracord Guide allows you to connect your ESD sling to your rifle with paracord and maintains a smaller profile knot that is tucked away and contained within the webbing of your sling. By having the knot stored securely in the paracord guide you no longer have to worry about the knot coming loose over time or untucking from the slings webbing and catching on anything and/or wearing into your neck. The ESD Paracord Guides are made using the same trusted materials and processes as ESD's Enhanced Foregrips (EFGs) and like all their products are made here in the USA. The ESD Paracord Guide has two claws that ensure your paracord guide and knot remain consistently tucked in your slings webbing when manipulating your firearm. This ensures that your sling moves around your body effortlessly and never hangs up. The small bumps on the inside claws of the paracord guide also act as anti-rotation tabs to prevent rotation within the loop formed by your sling. After securing your paracord through your rail and/or stock, and the Paracord guide you can then tie and tuck a square knot into the paracord guides channel. The ESD Paracord Guides will add virtually no weight to your setup weighing in at less than .2 ounces combined. They give you the sound reduction capabilities of the traditional paracord loops compared to any metal connections and give you the added benefits of strength and consistency to the knot by concealing it. When ordering the ESD Paracord guides you will receive two paracord guides, two pieces of 18" mil-spec 550 paracord, and a QR code link that leads to an instruction guide all packaged in a reusable tin. ESD chose to package the ESD Paracord Guides in a tin because it's a way to have packaging useful for more than transport. The tins can be used in various ways once the items have been removed. You can use the tin to store a small fishing kit, pocket first aid kit, or small survival kit, or even use the tin to make charcloth! The possibilities are endless.

## Attributes

- Name: [Edgar Sherman Design PARACORD GUIDE ATTACHMENT FOR ESD SLINGS, BLACK](#)
- Manufacturer: [Edgar Sherman Design](#)
- Product no.: 430105403
- Mfr. No.: ESD-PG-BLK

# ESD Paracord Guide Safety Instructions

## Introduction

Thank you for choosing the ESD Paracord Guide for your sling attachment needs. This guide provides essential safety instructions to ensure the safe and effective use of your product. The ESD Paracord Guide is designed to improve the connection between your sling and firearm while minimizing potential hazards. Please read this manual carefully before use.

## General Safety Guidelines

- Ensure that the ESD Paracord Guide is used only as intended, as a sling attachment for firearms.
- Always handle your firearm safely and responsibly, following all local laws and regulations.
- Regularly inspect the paracord and guide for wear or damage before each use.
- Keep the product out of reach of children and vulnerable individuals.
- If you experience any issues with the product, discontinue use immediately and seek support.

## Specific Safety Precautions for Use

- Avoid using the ESD Paracord Guide in extreme weather conditions that may affect the integrity of the paracord.
- Ensure that the knot is securely tied and tucked away in the paracord guide to prevent it from loosening or getting caught on other objects.
- Do not exceed the recommended weight limits for your sling and firearm setup.
- Be cautious of the environment in which you are using the firearm to avoid potential hazards.
- Always check that the paracord guide is properly attached to your sling and firearm before use.

## Instructions for Installation and Usage

### 1. Preparation

- Gather your ESD Paracord Guide, two pieces of 18" milspec 550 paracord, and your firearm with the sling.
- Ensure you have a clear workspace free from distractions.

### 2. Attaching the Paracord Guide

- Securely attach the paracord guide to your firearm's rail or stock.
- Thread the paracord through the designated channel in the paracord guide.
- Tie a square knot in the paracord and tuck it into the channel of the paracord guide.

### 3. Adjusting the Sling

- Adjust the sling to ensure it fits comfortably and securely on your body.
- Make sure the knot is tucked away and does not interfere with the movement of the sling.

### 4. Final Checks

- Check that the paracord guide and knot are securely in place.
- Perform a functional check of your sling and firearm setup to ensure everything is operating correctly.

## **Disposal Instructions**

- Dispose of the ESD Paracord Guide and any packaging materials in accordance with local regulations.
- Recycle the tin packaging when possible, as it can be repurposed for storage or other uses.

## **Contact Information for Further Support**

For any questions or concerns regarding the ESD Paracord Guide, please refer to the manufacturer's website or customer support resources provided with your product.

## **Conclusion**

By following these guidelines, you can ensure the safe and effective use of your ESD Paracord Guide. Thank you for your attention to safety, and enjoy your enhanced sling attachment experience.
