

BREECHTOOL™ CLEANING TOOLS - BROWNEllS BREECHTOOL SPARE BRUSH HEADS, BLACK, 5 PACK

[Gunsmith Tools](#) > [Rifle Tools](#) > [Bolt Tools](#) > [Bolt Lapping Tools](#)

Cleans Critical Areas of Your Guns FASTER & MORE Thoroughly Than Traditional Cleaning Methods The Breechtool™ is an easy-to-use cleaning tool that helps you keep your firearms running smoothly and reliably. Proven through extensive testing, the Breechtool™ can easily reduce cleaning time by up to 40%! Use it to quickly and thoroughly remove the stubbornest carbon buildup from the most hard-to-reach areas of your guns. It's so compact you can carry it with you at all times. You'll have the peace of mind of knowing you can give your gun a cleaning at any time, reducing the risk of a malfunction at a critical moment. With proper use, the Breechtool™ cannot damage your firearm, and of course, it's covered by the Brownells Forever Guarantee. The Breechtool™ is so versatile you can use it to clean a wide variety of rifles, including the AR-15, AR-308, M16, M4, C7A2, AR-18, AR-180, BRN-180, H&K G36, FN SCAR, FN15, HK416, HK417. It works just as well on pistols such as the Glock®, Smith & Wesson M&P, Springfield Armory XD, SIG P320, CZ 75, and many, many other firearms not listed here! Breechtool™ Original consists of three components designed for specific cleaning tasks. The patented main tool lets you get cleaning patches into tight places previously untouched effectively by any other cleaning tool on the market. Its unique shape enables you to dislodge stubborn carbon and grit by allowing both clockwise and counter-clockwise movement because it does not rely on a threaded attachment. The unique brush head can be angled to scrub any dirty part of the firearm. Two grades of stiffness, indicated by green and black brush heads, are strong enough to dislodge anything and bounce back time after time. The nylon bristles are tough on fouling but soft enough not to damage any part of the gun. The brushes are easily cleaned in warm, soapy water, but eventually they will wear out. Replacement brush heads are available here on Brownells.com. The pin tool is very useful for getting into hard-to-reach places. The straight, flat edge is excellent for scraping off carbon deposits, especially on gas system components. Breechtool Lite™ is the entry-level Breechtool™ for those on a budget who still want to do serious cleaning quickly. Its simplified profile lets you take advantage of the scrubbing action of the brush heads and the main tool, but it lacks the pin tool or folding joint. The handy Breechtool™ Ops Pack consists of the Original Breechtool™ and five (5) each of the Black and Green brush heads. Hasn't Scratched Yet, Never Will: The material of the Breechtool™ body is made of high-quality 304 Sheffield Stainless steel, which has about half the Vickers hardness of the barrels and barrel extensions on most modern rifles. The brush heads are made of non-marring Nylon 610, which is very oil resistant. All of this means the Breechtool™ will not - and has NEVER - damaged a firearm since 2009.

Background & Development: The Breechtool™ is the result of close collaboration with a huge group of specialists, including input from members of the armed forces of the United Kingdom, United States, and other countries. Development started in the U.K. in 2009 with direct involvement of soldiers, armorers, the Small Arms School Corps (SASC), and the Infantry Trials and Development Unit (ITDU) of the British Army, in conjunction with the University of Northumbria's School of Computing Engineering and Information Sciences. It later surpassed all tests and requirements of the U.K. Police Firearms Units, enabling the Breechtool's manufacturer to become an official supplier to these units.

BREECHTOOL™ Cleaning Tools Safety Instructions

Introduction

Thank you for choosing the BREECHTOOL™ Cleaning Tools. This guide provides essential safety instructions to ensure the safe and effective use of your cleaning tool. Please read this document carefully before using the product.

General Safety Guidelines

- Ensure that the BREECHTOOL™ is used only for its intended purpose as a firearm cleaning tool.
- Always keep the BREECHTOOL™ out of reach of children and vulnerable individuals.
- Inspect the BREECHTOOL™ and its components before each use to ensure they are in good condition.
- Do not use the BREECHTOOL™ if it is damaged or shows signs of excessive wear.
- Always follow the manufacturer's instructions for use and maintenance.
- Be aware of your surroundings and ensure that the area is safe for cleaning firearms.
- Use appropriate personal protective equipment (PPE) such as gloves and safety glasses when cleaning firearms.

Specific Safety Precautions for Use

- **Avoid Injuries:** Handle the BREECHTOOL™ with care to prevent injuries, such as cuts or scrapes from the brush heads or other components.
- **Firearm Safety:** Always ensure that your firearm is unloaded and pointed in a safe direction before cleaning.
- **Chemical Safety:** If using any cleaning solvents, ensure proper ventilation and follow the manufacturer's safety instructions for those products.
- **Proper Storage:** Store the BREECHTOOL™ in a dry place and away from direct sunlight to prevent damage to the materials.

Instructions for Installation and Usage

1. Preparation:

- Ensure your firearm is unloaded and in a safe position for cleaning.
- Gather all necessary cleaning supplies, including the BREECHTOOL™, brush heads, and cleaning patches.

2. Using the BREECHTOOL™:

- Select the appropriate brush head based on the cleaning task.
- Attach the brush head securely to the main tool.
- Insert the BREECHTOOL™ into the area you wish to clean, ensuring a snug fit.
- Use a gentle twisting motion to dislodge carbon buildup and debris.
- For stubborn areas, adjust the angle of the brush head to reach difficult spots effectively.
- After cleaning, remove the brush head and dispose of any used cleaning patches properly.

3. Cleaning and Maintenance:

- Clean the brush heads in warm, soapy water after use to maintain their effectiveness.
- Rinse thoroughly and allow to dry completely before storage.
- Replace brush heads as needed to ensure optimal cleaning performance.

Disposal Instructions

- Dispose of any used cleaning patches and wornout brush heads in accordance with local regulations.
- The BREECHTOOL™ itself should be disposed of responsibly. Check local guidelines for disposal of stainless steel and nylon materials.

Contact Information for Further Support

For any safety inquiries or additional support regarding the BREECHTOOL™, please refer to the manufacturer's website or customer service.

Thank you for prioritizing safety while using the BREECHTOOL™ Cleaning Tools. By following these guidelines, you help ensure a safe and effective cleaning experience for your firearms.
