

SIX PACK PRO PRESS KIT - LEE PRECISION SIX PACK PRO PRESS KIT 6.5 CREEDMOOR

[Reloading](#) > [Reloading Presses](#) > [Progressive Presses](#)

The culmination of nearly 40 years of progressive press design and production. Years of comments and suggestions have been incorporated into this new press. Pistol Six Pack Pro Kit includes: Six pack progressive press, Auto drum powder measure, shell plate, Universal case feed magazine, and Lee breech lock dies (carbide full length sizing die, powder through expanding die, bullet seating die, and instructions with load data). Carbide factory crimp die is sold separately, available as an accessory. Rifle Six Pack Pro Kit includes Six pack progressive press, Auto drum powder measure, shell plate, Universal case feed magazine, and Lee breech lock dies (full length sizing die, short charging die, easy adjust dead length bullet seating die, factory crimp die and instructions with load data). Features: Six stations allow any brand of die be used -- in line bullet feed dies, powder check dies and such. Simple and reliable automatic indexing -- just one moving part, replaceable in seconds, no tools required and never requires adjustment. Stroke and clearance sufficient for largest magnum rifle cases. Uses the same all steel linkage found on our Classic Cast 50 BMG press. Massive 28.4mm ram glides through 82 mm of solid steel giving the ram over 7300 mm² of solid support. Spent primer tube collects dirty, gritty spent primers. All dies securely fastened in the upper die carrier with Lee Smart Lock bushings. No more turret or tool head to replace or move during use. Automatic priming system - simple, reliable and safe with any brand or size of primer. Primes at the bottom of stroke so all six stations are available for operations. Automatic case inserter works with any case. Cases can be manually fed through the convenient loading port. Includes the Lee case feed magazine, works with most hand gun cases and all AR rifle cases. Easy to set case retainers on every station. No springs, plugs or buttons to loose or tinker with. Cartridge changeover in seconds, including primer size with no adjustments. Automatic case ejector reliably whisks away your completed round to the ammo bin. Press includes combination tool rack, bin bracket, along with free ammo bin.

Attributes

- Name: [LEE PRECISION SIX PACK PRO PRESS KIT 6.5 CREEDMOOR](#)

Safety Instruction Guide for the SIX PACK PRO PRESS KIT

Introduction

Thank you for choosing the SIX PACK PRO PRESS KIT by Lee Precision. This guide provides essential safety instructions and guidelines to ensure the safe and effective use of your new progressive press. Please read this document carefully before using the product.

General Safety Guidelines

- Ensure that you are familiar with the operation of the press before use.
- Keep the workspace clean and organized to prevent accidents.
- Always wear appropriate personal protective equipment, including safety glasses and gloves.
- Store the press in a dry and cool environment to prevent rust and damage.
- Do not modify or alter the press in any way.
- Keep children and pets away from the workspace while operating the press.
- Regularly inspect the press for any signs of wear or damage. If any issues are found, cease use immediately and contact support.

Specific Safety Precautions for Use

- Before starting, ensure that all components are securely fastened and properly installed.
- Use only the recommended Lee breech lock dies and accessories with this press.
- Do not exceed the maximum capacity of the press as specified in the product manual.
- Always use the press with the appropriate ammunition components. Do not use reloaded ammunition that does not meet safety standards.
- Follow the manufacturer's instructions for powder handling and storage to prevent fire hazards.
- Ensure that the press is on a stable surface to prevent tipping during operation.
- When inserting cases or handling ammunition, keep fingers and hands clear of moving parts.
- Utilize the automatic priming system carefully, ensuring proper alignment of primers.
- Always check for obstructions in the press before commencing operation.

Instructions for Installation and Usage

1. Installation

- Unpack all components from the box and ensure nothing is missing.
- Place the press on a sturdy workbench, ensuring it is securely fastened.
- Attach the shell plate and ensure it is properly aligned.
- Install the Lee breech lock dies according to the provided instructions.
- Connect the auto drum powder measure and ensure it is calibrated correctly.

2. Usage

- Load the desired case into the shell plate.
- Adjust the dies as needed for the specific cartridge you are using.
- Start the press and use the automatic indexing feature to progress through the stages of reloading.
- Monitor the operation closely and ensure that all components are functioning correctly.
- After completing the reloading process, safely remove the completed rounds and store them properly.

Disposal Instructions

- Dispose of any unused or expired ammunition components in accordance with local regulations.
- Recycle packaging materials where possible.
- Do not dispose of hazardous materials, such as spent primers, in regular trash. Follow local guidelines for hazardous waste disposal.

Contact Information for Further Support

For further assistance or inquiries regarding the SIX PACK PRO PRESS KIT, please refer to the manufacturer's website or customer support resources.

By following these safety instructions and guidelines, you can ensure a safe and effective reloading experience with your SIX PACK PRO PRESS KIT. Always prioritize safety and consult the product manual for additional information. Thank you for choosing Lee Precision!
