

INTELLIFIRE™! TRIGGER FOR SIG SAUER® P365 - TYRANT CNC

INTELLIFIRE TRIGGER FOR SIG SAUER P365 BLACK W/BLEUE BLADES

[Handgun Parts](#) > [Trigger Group Parts](#) > [Trigger Parts](#) > [Triggers](#)

Introducing the Tyrant CNC IntelliFire™ Trigger System for SIG SAUER P365. What could be better than a SIG SAUER P365? How about a P365 with the Tyrant CNC IntelliFire™ dual safety blade action trigger, with a solid 90 degree break AND 30% less pre-travel/take up! The SIG SAUER P365 has made waves in the concealed carry world, revered for its compact size and powerful punch. Whether you're a seasoned professional or an everyday carrier, reliability is key. The Tyrant CNC IntelliFire™ Trigger System, specifically tailored for the P365, pushes the boundaries of what you can expect from aftermarket trigger enhancements. In the realm of firearm customization, the trigger plays a pivotal role, influencing both the firearm's performance and the safety of its operator. Although a capable and favored handgun, the Sig P365 lacks the traditionally-used safety feature; the trigger safety. Tyrant CNC, fully recognizing the importance and demand for additional safety features, crafted the IntelliFire™ Trigger System with aerospace-like precision, ensuring it integrates seamlessly with the SIG SAUER P365. Crafted for Durability and Precision Built to withstand the daily rigors of use and ensure peak performance, the trigger boasts a robust 12L14 steel body. Lightweight 6061 aluminum safety blades further accentuate its durability and precision. A Stainless steel and heat-treated internal spring ensures reliability of use that will outlive the firearms duty cycle. Safety First: A Dual Safety Blade System Safety in firearms is non-negotiable. The standout feature of this trigger is its patent-pending dual safety blade system. The OEM Grip module of the P365 offers only a narrow window of clearance, making traditional safety blade designs impossible to function. This is where the genius of Tyrant CNC shines. Through innovative geometry and a specialized spring, the IntelliFire™ safety blade system utilizes a 3:1 lever ratio in order to clear the grip module when activated. However, if the front blade remains undepressed, the rear blade will directly impact the 365 Grip Module preventing the firing pin from dropping and enhancing safety. Reduced Pre-Travel & Hybrid Ergonomics The trigger facilitates a 30% reduction in pre-travel, ensuring a smoother and quicker shooting experience without compromising on safety. Further enhancing the user experience, Tyrant CNC incorporates its signature hybrid trigger ergonomics, featuring a flat face with a subtle bottom curve - the ideal blend for optimal performance. Experience a consistent break at the 90 degree angle, making your initial AND follow up shots the closest groupings you can have. With the Tyrant CNC IntelliFire™ Trigger System, you're investing in unmatched engineering and an unwavering focus on safety. Elevate your confidence in daily or concealed carry, especially for those favoring appendix carry, and arm your SIG SAUER P365 with cutting-edge trigger technology.

FEATURES Platform: Sig-Sauer Designed For Models: P365 Fitment Notes Works with standard SIG SAUER P365 variants Drop in replacement Works with Aftermarket Grip Modules *May not be compatible with California Compliant P365 models with manual magazine disconnect feature installed* First ever trigger safety system for SIG P365, patent-pending technology 30% reduced trigger pre-travel (maximum that can be done without disengaging SIG internal safety) 90 degree break for maximum consistency on initial AND follow-up shots Stainless steel trigger body, aluminum safety blades

Attributes

Safety Instruction Guide for Tyrant CNC IntelliFire Trigger System for SIG SAUER P365

Introduction

Thank you for choosing the Tyrant CNC IntelliFire Trigger System for your SIG SAUER P365. This guide provides essential safety instructions to ensure the safe use and installation of your new trigger system. Please read this guide thoroughly before use.

General Safety Guidelines

- Ensure that you are familiar with the operation of your SIG SAUER P365 before installing the IntelliFire Trigger System.
- Always treat your firearm as if it is loaded, even when you believe it is unloaded.
- Store your firearm and trigger system in a secure location, out of reach of children and unauthorized users.
- Do not modify the trigger system or any other parts of your firearm without consulting a qualified gunsmith.
- Regularly inspect your firearm and trigger system for wear and tear to ensure safe operation.
- Follow all local laws and regulations regarding firearm ownership and modifications.

Specific Safety Precautions for Use

- **Dual Safety Blade System:** The IntelliFire Trigger System features a dual safety blade system. Ensure that both blades are functioning correctly before use.
- **PreTravel Reduction:** The trigger system reduces pretravel by 30%. Familiarize yourself with this change to avoid unintentional discharges.
- **Grip Module Clearance:** The design of the trigger system requires proper clearance in the grip module. Ensure that the trigger system is installed correctly to avoid interference.
- **Manual Magazine Disconnect:** Note that the trigger system may not be compatible with California Compliant P365 models equipped with a manual magazine disconnect feature.

Instructions for Installation and Usage

1. Installation:

- Ensure your firearm is unloaded and pointed in a safe direction.
- Remove the existing trigger system from your SIG SAUER P365 according to the manufacturer's instructions.
- Carefully install the Tyrant CNC IntelliFire Trigger System, ensuring that all components are securely in place.
- Check that the dual safety blades are properly aligned and functioning.

2. Usage:

- Before using your firearm with the new trigger system, conduct a function check to ensure proper operation.
- Practice safe handling and shooting techniques, focusing on the unique characteristics of the IntelliFire Trigger System.
- Regularly clean and maintain your trigger system to ensure optimal performance.

Disposal Instructions

- Dispose of any packaging materials in accordance with local waste disposal regulations.
- If you need to dispose of the trigger system, check with your local authorities for proper disposal methods for firearm components.

Contact Information for Further Support

For any questions or concerns regarding the Tyrant CNC IntelliFire Trigger System, please refer to the manufacturer's website or contact their customer support for assistance.

Conclusion

Your safety is paramount when using firearm accessories. By following these guidelines and instructions, you can ensure a safe and enjoyable experience with your Tyrant CNC IntelliFire Trigger System for the SIG SAUER P365. Stay informed about the latest safety updates and recalls via the EU Safety Gate platform. Thank you for prioritizing safety.
