Overwhelmed by the countless options for a simple chest rig? Brownells has created the “easy button” with the Micro Fight Chassis MkV Starter Kit! This rig is ready to wear right out of the box, with the flexibility to customize and build it to suit your needs as you go. At the core of this starter kit is the Micro Fight Chassis MkV, a single-cell, placard-style chassis made with all-new materials and advanced manufacturing processes. The design features MOLLE on the front and sides, allowing for the addition of extra pouches and gear. With the universal retention kit, you can securely stow tourniquets and other equipment externally, while a row of anchor points along the top edge interfaces with our magazine bungee retention kit to secure any caliber of weapon. The main cell of the MkV Chassis is lined with hook and loop on both sides, accommodating all Spiritus Systems’ magazine inserts (including the 3-mag 5.56 inserts provided). Versatile and scalable, the Micro Fight Chest Rig MkV is compatible with the entire Spiritus Systems chest rig and plate carrier components. Its footprint is identical to the Mk4, ensuring seamless integration with Expander Wings, LV/119 plate bags, and the Thing 1 and Thing 2 accessories. The MkV is an excellent choice for low-bulk solutions in environments where space and weight are at a premium. However, its modularity and compatibility with all Spiritus Accessories allow the Micro Fight to scale from a minimalistic magazine carrier to a full-fledged plate carrier system or various sustainment and comms-focused chest rigs. Kit includes: MkV Micro Fight Chassis Backstraps Fat Strap shoulder straps Triple 5.56 magazine insert
