

UNITY™ TACTICAL AXON™ SWITCH W/LINK™ USB-C/CRANE LASER LEADS - GBRS GROUP UNITY TACT AXON SWITCH 7" LINK USB-C/10" CRANE LASR LEAD BLK

GBRS GROUP UNITY™ TACTICAL AXON™ SWITCH W/LINK™ USB-C /CRANE LASER LEADS The pinnacle of remote switch design for weapon-mounted accessories, UNITY™ Tactical's AXON™ provides complete control of lights and lasers in a single, compact and rugged housing. AXON™ is the direct result of operational feedback from professional end-users on their industry-leading switch technology. Lights and lasers can be fired from individual buttons with versions available for popular issued devices. Standard AXON™ models feature each button firing devices independently. SYNC models fire the laser independently (flat button), while the angled button will fire both light and laser simultaneously. NGAL variants operate in a SYNC capacity, but offer a visible override feature for light and laser. AXON™ mounts directly to M1913 Rail or M-LOK® (w/ optional UNITY™ M-LOK® Mounting Kit), while the Rail Clamps feature pass-throughs for zip ties. Its unique design provides tactile differentiation between the two buttons to eliminate confusion in dark, cold and high-stress situations. The light (angled) button features a switch that allows for both momentary and constant activation, while the laser (flat) button features a momentary-only button that supports the laser's double-click-for-constant-on feature. GBRS Group is the exclusive retailer of AXON™ 10" and 14" models with extended-length cables, which complements use with their Hydra mount. GBRS offers AXON™ Mode Select models with 7" SureFire® cables or 7" Link™ USB-C with either 10" Crane cables, 14" Crane cables, or 14" NGAL cables. SPECS Rail Mount: MIL-STD M1913, M-LOK® (w/ optional UNITY™ M-LOK® Mounting Kit) Dimensions: 1.3"W x 2.8"L x 1.1"H (3.3 x 7.1 x 2.8 cm) Weight: 1.7 oz (48.2g) Material: High-Impact Polymer Cable Length: 7" Link™ USB-C Cable / 10" Crane Cable, 7" Link™ USB-C Cable / 14" Crane Cable Recommended Torque: 5 In./Lbs (0.57 Nm) *NOTE: Over-torquing fasteners can damage your mount and/or your optic and will void your warranty. Using thread locking compounds, such as Loctite® or others, is not recommended and will void your warranty. Safety Instruction Guide for UNITY Tactical AXON Switch

Introduction

Thank you for choosing the UNITY Tactical AXON Switch. This safety instruction guide provides essential information to ensure your safe and effective use of this product. Please read all instructions carefully before installation and usage.

General Safety Guidelines

- Ensure the product is used only for its intended purpose as a remote switch for weaponmounted accessories.
- Always follow the manufacturer's instructions for installation and usage.
- Keep the product out of reach of children and vulnerable individuals.
- Inspect the product regularly for any signs of wear or damage. Do not use if damaged.
- In case of any malfunction or damage, discontinue use immediately and contact the manufacturer for support.
- Report any unsafe products or accidents to the appropriate authorities.

Specific Safety Precautions for Use

- Do not exceed the recommended torque of 5 In./Lbs (0.57 Nm) during installation to avoid damage.
- Avoid using thread locking compounds, such as Loctite, as they may void your warranty and damage the product.
- Be cautious when using the device in lowlight conditions to prevent accidental activation.
- Ensure that the buttons are not obstructed by other equipment or accessories during use.
- Do not modify the product or attempt repairs unless authorized by the manufacturer.

Instructions for Installation and Usage

Installation

1. Mounting the AXON Switch:

- Select a suitable location on your weapon's M1913 Rail or MLOK®.
- If using the optional UNITY MLOK® Mounting Kit, follow the installation instructions provided with the kit.
- Secure the AXON Switch using the provided hardware, ensuring it is tightly fastened but not overtorqued.

2. Cable Connection:

- Connect the appropriate cable (7" Link™ USB-C Cable or Crane Cable) to the AXON Switch.
- Ensure that the cable is routed securely without risk of snagging or damage.

Usage

1. Activating Lights and Lasers:

- Use the angled button to activate the light. This button allows for both momentary and constant activation.
- Use the flat button to activate the laser. This button supports momentary activation only and

utilizes a doubleclick feature for constanton.

2. Operating in SYNC Mode:

- For models equipped with SYNC functionality, the flat button activates the laser independently, while the angled button activates both light and laser simultaneously.

3. Safety Checks:

- Before each use, check that all connections are secure and that the device operates as intended.

Disposal Instructions

- Dispose of the product in accordance with local regulations for electronic waste.
- Do not dispose of the product in regular household waste.
- Remove batteries if applicable and recycle them according to local guidelines.

Contact Information for Further Support

For any inquiries or support regarding the UNITY Tactical AXON Switch, please refer to the manufacturer's website or contact their customer support.

By following these guidelines, you can ensure the safe and effective use of your UNITY Tactical AXON Switch. Thank you for your attention to safety, and enjoy your product!
