

NECK SIZING BUSHINGS - L.E. WILSON STEEL NECK SIZER DIE BUSHING .308

[Reloading](#) > [Reloading Dies](#) > [Neck Size Bushings](#)

Hardened stainless steel neck bushing from L.E. Wilson. Wilson makes their bushings in .001" increments. The size marked on them refers to the middle of the bushing, which is reamed with a .003" taper. Since the case neck only reaches the middle, a slightly tighter sizing can be achieved by turning the bushing over, with the markings facing toward the case (markings facing down). This is mainly an emergency step to be taken if the brass has hardened, springing back more, and will no longer hold the bullet; or for fine-tuning the sizing to provide less additional "squeeze" than using the next smaller bushing in the normal way. Made to similar specs to the Redding neck bushings. Will not interchange with Forster or RCBS dies. Brownells Gun Tech™ Tip: There are two ways to select the steel neck bushings you need: (1) Measure the outside neck diameter of your loaded cartridge and subtract .002" to .003". This allows approximately .001" of brass to spring back for correct neck tension. (2) You can also measure the neck wall thickness of your case, multiply by two, add the diameter of your bullet and subtract .002" to .003".

Attributes

- Name: [L.E. WILSON STEEL NECK SIZER DIE BUSHING .308](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749002370
- Mfr. No.: B-308
- Diameter (in): .308
- Delivery weight: 0.032kg
- Shipping height: 1mm
- Shipping width: 57mm
- Shipping length: 89mm
- UPC: 815145024985

Safety Instruction Guide for NECK SIZING BUSHINGS L.E. WILSON STEEL NECK SIZER DIE BUSHING .308

Introduction

Thank you for choosing the NECK SIZING BUSHINGS L.E. WILSON STEEL NECK SIZER DIE BUSHING .308. This guide provides essential safety instructions and guidelines to ensure the safe use of this product. Please read it carefully before use.

General Safety Guidelines

- Ensure that the product is used for its intended purpose as specified in the product description.
- Always handle the neck sizing bushings with care to avoid injury.
- Keep the bushings out of reach of children and vulnerable individuals.
- Inspect the bushings for any signs of damage or wear before use. Do not use if damaged.
- Follow all local regulations regarding the use and disposal of firearms and related equipment.

Specific Safety Precautions for Use

- When using the neck sizing bushings, wear appropriate eye protection to prevent injury from debris.
- Avoid using excessive force when sizing cases, as this may lead to equipment failure or personal injury.
- Ensure that the bushing is properly seated in the die before use to prevent accidents.
- Do not attempt to modify or alter the bushings in any way, as this may compromise safety and effectiveness.
- Be aware of the potential hazards associated with handling brass and reloading components, including exposure to lead.

Instructions for Installation and Usage

1. Selecting the Right Bushing

- Measure the outside neck diameter of your loaded cartridge.
- Subtract .002" to .003" from this measurement to select the appropriate bushing size.
- Alternatively, measure the neck wall thickness of your case, multiply by two, add the diameter of your bullet, and subtract .002" to .003".

2. Installation

- Ensure that the die is securely mounted in your reloading press.
- Insert the selected neck sizing bushing into the die, ensuring that it is seated properly.
- If necessary, turn the bushing over with the markings facing down for tighter sizing.

3. Usage

- Insert the case into the die and apply even pressure to size the neck.
- Avoid using excessive force; let the die do the work.
- After sizing, inspect the case to ensure proper neck tension.

Disposal Instructions

- Dispose of any damaged or worn bushings in accordance with local regulations.
- Recycle brass components where possible, following your local recycling guidelines.
- Do not dispose of the product in regular household waste.

Contact Information for Further Support

For any inquiries or additional support regarding the NECK SIZING BUSHINGS L.E. WILSON STEEL NECK SIZER DIE BUSHING .308, please refer to the contact information provided by the retailer or manufacturer.

By following these guidelines and instructions, you can ensure the safe and effective use of your neck sizing bushings. Thank you for your attention to safety.
