

NECK SIZING BUSHINGS - L.E. WILSON STEEL NECK SIZER DIE BUSHING .263

[Reloading](#) > [Reloading Dies](#) > [Neck Size Bushings](#)

Hardened stainless steel neck bushing from L.E. Wilson. Wilson makes their bushings in .001" increments. The size marked on them refers to the middle of the bushing, which is reamed with a .003" taper. Since the case neck only reaches the middle, a slightly tighter sizing can be achieved by turning the bushing over, with the markings facing toward the case (markings facing down). This is mainly an emergency step to be taken if the brass has hardened, springing back more, and will no longer hold the bullet; or for fine-tuning the sizing to provide less additional "squeeze" than using the next smaller bushing in the normal way. Made to similar specs to the Redding neck bushings. Will not interchange with Forster or RCBS dies. Brownells Gun Tech™ Tip: There are two ways to select the steel neck bushings you need: (1) Measure the outside neck diameter of your loaded cartridge and subtract .002" to .003". This allows approximately .001" of brass to spring back for correct neck tension. (2) You can also measure the neck wall thickness of your case, multiply by two, add the diameter of your bullet and subtract .002" to .003".

Attributes

- Name: [L.E. WILSON STEEL NECK SIZER DIE BUSHING .263](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749002427
- Mfr. No.: B-263
- Diameter (in): .263
- Delivery weight: 0.032kg
- Shipping height: 1mm
- Shipping width: 57mm
- Shipping length: 89mm
- UPC: 815145024534

NECK SIZING BUSHINGS L.E. WILSON STEEL NECK SIZER DIE BUSHING .263 Safety Instructions

Introduction

Thank you for choosing the L.E. Wilson Steel Neck Sizer Die Bushing .263. This product is designed to assist in achieving precise neck sizing for your ammunition. To ensure safe and effective use, please read and follow these safety instructions carefully.

General Safety Guidelines

- Always use the neck sizing bushing in accordance with the manufacturer's instructions.
- Ensure that the bushing is compatible with your specific reloading equipment.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the bushing for any signs of wear or damage before each use.
- If you experience any issues during use, cease operation immediately and consult a professional.

Specific Safety Precautions for Use

- Do not exceed the recommended sizing specifications. Using a bushing that is too small may cause damage to the case or result in unsafe ammunition.
- When reversing the bushing for tighter sizing, do so cautiously and only when necessary.
- Avoid using the bushing with cases that have been significantly deformed or damaged.
- Always wear appropriate safety gear, including eye protection, when reloading ammunition.
- Ensure that your workspace is clean and free from obstructions to prevent accidents.

Instructions for Installation and Usage

1. Selecting the Right Bushing:

- Measure the outside neck diameter of your loaded cartridge.
- Subtract .002" to .003" from this measurement to determine the appropriate bushing size.
- Alternatively, measure the neck wall thickness, multiply by two, add the bullet diameter, and subtract .002" to .003".

2. Installation:

- Ensure that your reloading die is clean and free from obstructions.
- Insert the neck sizing bushing into the die according to the manufacturer's instructions.
- Secure the bushing in place to prevent movement during operation.

3. Usage:

- Place the cartridge case into the die and apply consistent pressure to size the neck.
- If necessary, turn the bushing over for tighter sizing, ensuring the markings face downward toward the case.
- Inspect the sized case for proper neck tension before proceeding to load the bullet.

Disposal Instructions

- Dispose of any damaged or worn bushings in accordance with local regulations for metal waste.
- Do not throw the bushing in regular household trash. Instead, check for recycling options available in your area.

Contact Information for Further Support

For any questions or concerns regarding the safe use of the L.E. Wilson Steel Neck Sizer Die Bushing .263, please refer to the manufacturer's contact details provided with your purchase. It is important to reach out for guidance if you encounter any issues or require additional information.

By following these safety instructions, you can ensure a safe and effective reloading experience. Thank you for your attention to these important guidelines.
