

FULL LENGTH DIE SETS - RCBS FULL LENGTH 2-DIE SET 222 REMINGTON

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

Full length die sets are for bottleneck rifle and pistol cases, and they include a full length sizing die and a seater die. The full length die will bump the shoulder of the case to extent the die is adjusted up or down in the press. We suggest using a cartridge headspace gage tool to get the correct shoulder bump. The full length die also sizes the body of the case so it will chamber easily for the next firing, then the die decaps the spent primer. The expander ball passes through the neck of the case and sizes the neck to the correct tension. Cases must be lubricated before full length sizing. The RCBS seater dies for bottleneck cases will seat bullets correctly in full length sized cases or neck sized cases. These seater dies have a built-in crimp ring to enable you to crimp the case into the bullet if you wish to. The seater die is easily adjusted to crimp or not to crimp by raising or lowering the die position in the press. Full length 2 die sets are the basic building block of the reloading process. Many shooters wear out multiple barrels or rifles using just one full length reloading die set. We recommend that new reloaders start with a full length die set and learn how to set the dies up correctly before they jump in to other types of reloading dies.

Attributes

- Name: [RCBS FULL LENGTH 2-DIE SET 222 REMINGTON](#)
- Manufacturer: [RCBS](#)
- Product no.: 749004623
- Mfr. No.: 10901

Consumer Safety Instruction Guide for RCBS Full Length 2Dye Set 222 Remington

Introduction

Thank you for choosing the RCBS Full Length 2Dye Set for 222 Remington. This guide provides essential safety instructions to ensure the safe and effective use of your die set. Please read this guide carefully to understand the safety precautions, proper usage, and disposal instructions.

General Safety Guidelines

- Always ensure that your workspace is clean and free from clutter before beginning any reloading process.
- Use the die set only for its intended purpose as described in this guide.
- Keep the die set and all reloading components out of reach of children and unauthorized users.
- Wear appropriate safety gear, including safety glasses, when handling reloading equipment and components.
- Regularly inspect all equipment for signs of wear or damage. Do not use damaged equipment.
- Report any unsafe products or accidents to the appropriate authorities.
- Stay informed about product recalls by checking the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Ensure that cases are properly lubricated before full length sizing to prevent stuck cases or damage to the die.
- Adjust the full length sizing die carefully to achieve the correct shoulder bump. Use a cartridge headspace gauge tool for accuracy.
- Avoid overadjusting the die, as this can lead to excessive sizing and potential case damage.
- When seating bullets, confirm that the seater die is set correctly to avoid damaging the bullet or case.
- Use the builtin crimp ring only if necessary. Improper crimping can affect bullet performance and safety.
- Always handle primers with care. Follow proper safety protocols when decapping spent primers.
- Do not exceed recommended loads or use improper components that could lead to dangerous situations.

Instructions for Installation and Usage

1. Setup:

- Ensure your reloading press is securely mounted and stable.
- Clean the dies and press before installation to remove any debris or residue.

2. Installing the Full Length Sizing Die:

- Insert the full length sizing die into the press.
- Adjust the die height according to the manufacturer's instructions to achieve the desired shoulder bump.
- Lock the die in place once the correct adjustment is made.

3. Lubricating Cases:

- Apply a suitable case lubricant evenly to the exterior of the cases before sizing.
- Avoid excessive lubrication, as this can lead to contamination of the powder.

4. Full Length Sizing Process:

- Insert a lubricated case into the shell holder of the press.
- Operate the press to size the case fully. Ensure the die is functioning correctly without resistance.

5. Seating Bullets:

- Replace the sizing die with the seater die.
- Adjust the seater die to the desired bullet seating depth.
- Insert the bullet into the case mouth and operate the press to seat the bullet.

6. Crimping (if applicable):

- If crimping is desired, adjust the seater die to engage the crimp ring.
- Operate the press to crimp the case into the bullet securely.

7. Final Inspection:

- Inspect each loaded round for proper seating and crimping.
- Ensure that all rounds are free from defects before use.

Disposal Instructions

- Dispose of any used or damaged components in accordance with local regulations.
- Do not dispose of primers or powder in regular trash. Follow hazardous waste disposal guidelines.
- Ensure that all reloading materials are stored safely and securely until disposal.

Contact Information for Further Support

For any inquiries regarding safety, usage, or product information, please contact your local RCBS distributor or authorized dealer.

Thank you for prioritizing safety in your reloading practices. Enjoy your reloading experience with the RCBS Full Length 2Dye Set 222 Remington.
