

THUMLER'S MODEL "B" ROTARY TUMBLER - THUMLERS TUMBLER MODEL B TUMBLER 110V

[Reloading](#) > [Case Cleaning](#) > [Case Tumblers & Accessories](#)

Thumler's heavy-duty Model "B" tumbler has a large-capacity drum that easily handles up to 15 lbs. of material for high-volume runs to help you clean a lot of brass fast. Used by serious reloaders, professional gunsmiths, and even industrial manufacturers for a variety of cleaning and polishing operations. The heavy-gauge steel hexagon drum has a rubber lining for ultra-quiet operation. Continuous duty electric motor delivers plenty of power without faltering, even on full-capacity loads, while the built-in circuit overload protection prevents overheating. The Model B is available alone. Never wears out, doesn't need to be "renewed" like treated organic media, and won't harm the brass. Stainless steel media (5 lbs.) also available separately.

NOTE: These must be run with a water/detergent/stainless steel pin mix to properly clean brass.

Safety Instructions for THUMLER'S MODEL "B" ROTARY TUMBLER

Introduction

Thank you for purchasing the Thumler's Model "B" Rotary Tumbler. This product is designed for cleaning and polishing brass and other materials efficiently. To ensure safe and effective use, please read and follow these safety instructions carefully.

General Safety Guidelines

- Always operate the tumbler on a stable, flat surface to prevent tipping.
- Ensure that the tumbler is unplugged when not in use or when performing maintenance.
- Do not exceed the maximum load capacity of 15 lbs. to avoid motor strain and potential hazards.
- Keep the tumbler out of reach of children and vulnerable individuals.
- Be aware of the noise level during operation; the tumbler is designed for quiet operation, but prolonged exposure to noise can still be harmful.
- Always use the tumbler in a wellventilated area to avoid the buildup of dust or fumes.
- Inspect the tumbler and its components regularly for any signs of wear or damage.

Specific Safety Precautions for Use

• Electrical Safety:

- Ensure that the tumbler is connected to a power supply that matches the voltage rating of 110V.
- Avoid using extension cords that may not support the power requirements of the tumbler.

• Material Handling:

- Only use the tumbler with appropriate media, such as stainless steel media, to avoid damage to the tumbler and ensure effective cleaning.
- Do not use flammable or hazardous materials inside the tumbler.

• Personal Safety:

- Wear safety goggles and gloves when loading and unloading materials to protect against dust and debris.
- Be cautious of sharp edges on cleaned materials, as they may cause injury.

Instructions for Installation and Usage

1. Installation:

- Place the tumbler on a stable, flat surface.
- Ensure that the power cord is not pinched or damaged and is positioned safely away from water sources.
- Plug the tumbler into a compatible electrical outlet.

2. Loading the Tumbler:

- Open the drum lid and add the appropriate cleaning media and materials.
- Ensure that the total weight does not exceed 15 lbs.
- Close the drum securely before operating.

3. Operating the Tumbler:

- Turn on the tumbler using the power switch.
- Monitor the operation periodically to ensure it is running smoothly.
- If the tumbler becomes excessively hot or shows signs of malfunction, turn it off immediately and unplug it.

4. Unloading the Tumbler:

- Once the cleaning cycle is complete, turn off the tumbler and unplug it.
- Allow the tumbler to cool before opening the drum.
- Carefully remove the cleaned materials and media, taking care to avoid sharp edges.

Disposal Instructions

- Dispose of any unused or damaged materials according to local regulations.
- Do not dispose of the tumbler in regular household waste. Check with local waste management for proper disposal methods for electrical appliances.
