

THUMLER'S MODEL "B" ROTARY TUMBLER - MODEL B TUMBLER 220V

[Reloading](#) > [Case Cleaning](#) > [Case Tumblers & Accessories](#)

Thumler's heavy-duty Model "B" tumbler has a large-capacity drum that easily handles up to 15 lbs. of material for high-volume runs to help you clean a lot of brass fast. Used by serious reloaders, professional gunsmiths, and even industrial manufacturers for a variety of cleaning and polishing operations. The heavy-gauge steel hexagon drum has a rubber lining for ultra-quiet operation. Continuous duty electric motor delivers plenty of power without faltering, even on full-capacity loads, while the built-in circuit overload protection prevents overheating. The Model B is available alone. Never wears out, doesn't need to be "renewed" like treated organic media, and won't harm the brass. Stainless steel media (5 lbs.) also available separately.

NOTE: These must be run with a water/detergent/stainless steel pin mix to properly clean brass.

Safety Instruction Guide for Thumler's Model "B" Rotary Tumbler

Introduction

Thank you for choosing Thumler's Model "B" Rotary Tumbler. This heavyduty tumbler is designed to efficiently clean and polish brass and other materials. To ensure your safety and the longevity of the product, please read and follow these safety instructions carefully.

General Safety Guidelines

- Always follow the manufacturer's instructions for safe use.
- Ensure the tumbler is used in a wellventilated area.
- Keep the tumbler out of reach of children and pets.
- Inspect the tumbler regularly for any signs of wear or damage.
- Do not use the tumbler for any purpose other than its intended use.
- Report any unsafe products or accidents to the relevant authorities.
- Check for recall updates on the EU's Safety Gate platform.

Specific Safety Precautions for Use

- **Electrical Safety:**
 - Ensure that the tumbler is connected to a power supply that matches the specified voltage (220V).
 - Avoid using extension cords that are not rated for the product's power requirements.
 - Do not operate the tumbler with wet hands or in wet conditions.
- **Material Safety:**
 - Only use recommended cleaning media suitable for the tumbler.
 - Do not overload the tumbler beyond its capacity of 15 lbs. of material.
 - Ensure that all materials used are compatible with the tumbler to avoid chemical reactions.
- **Operational Safety:**
 - Always monitor the tumbler during operation.
 - Do not attempt to open the tumbler while it is in operation.
 - Allow the tumbler to cool down before handling after use.

Instructions for Installation and Usage

1. **Setup:**
 - Place the tumbler on a stable, flat surface away from edges.
 - Ensure that the area is dry and wellventilated.
2. **Loading the Tumbler:**
 - Open the drum and load the materials and cleaning media according to the recommended capacity.
 - Securely close the drum before operation.
3. **Connecting Power:**
 - Plug the tumbler into a properly grounded outlet that matches the voltage requirement (220V).
4. **Operation:**
 - Turn on the tumbler using the power switch.
 - Monitor the operation to ensure it is functioning correctly.
5. **After Operation:**
 - Once the cleaning cycle is complete, turn off the tumbler and unplug it from the power source.
 - Allow the tumbler to cool before opening the drum to remove cleaned materials.

Disposal Instructions

- Dispose of the tumbler according to local regulations for electronic waste.
- Ensure that all cleaning media and materials are disposed of in an environmentally friendly manner.
- Do not dispose of the tumbler in regular household waste.

Contact Information for Further Support

For any inquiries or support, please refer to the manufacturer's contact details provided with your product. Always ensure that you have the correct information for safety inquiries.

Thank you for your attention to these safety instructions. Enjoy the efficient cleaning and polishing capabilities of your Thumler's Model "B" Rotary Tumbler!
