

FLAT BULLET SEATING MICROMETER - REDDING #5 FLAT BULLET SEATING MICROMETER

[Reloading](#) > [Reloading Dies](#) > [Replacement Parts & Upgrades](#)

Redding Bullet Seating Micrometers are for use with most standard Redding Seating Dies and provide a direct replacement for the original seat plug. They provide a direct replacement for the original seat plugs and can easily be changed from one die to another. Redding Bullet Seating Micrometers for bottleneck cartridges are available for traditional bullet shapes (STD) and for VLD bullet shapes (VLD). They are also available for handgun and straight wall cartridges with traditional bullet shapes (STD) and flat nose bullet designs (FLAT).

Safety Instruction Guide for Redding Flat Bullet Seating Micrometer

Introduction

Thank you for choosing the Redding Flat Bullet Seating Micrometer. This guide provides essential safety instructions to ensure safe usage and maintenance of the product. Please read this document thoroughly before using the micrometer to understand how to operate it correctly and safely.

General Safety Guidelines

- Ensure the micrometer is used in accordance with the manufacturer's instructions.
- Always inspect the micrometer for damage before each use. Do not use if damaged.
- Keep the micrometer out of reach of children and vulnerable individuals.
- Use the micrometer only for its intended purpose, which is to adjust seating depth for bullets.
- Store the micrometer in a safe and dry location when not in use.
- Be aware of your surroundings when using the micrometer to prevent accidents.

Specific Safety Precautions for Use

- Always wear appropriate safety gear, including safety glasses, when using the micrometer.
- Ensure that your hands are dry and clean while handling the micrometer.
- Avoid using excessive force when adjusting the seating depth to prevent damage to the micrometer or injury.
- Do not modify the micrometer in any way, as this may compromise its safety and functionality.
- Be cautious of sharp edges on the micrometer, which may cause cuts or injuries.
- Follow all local laws and regulations regarding the handling and use of ammunition and reloading equipment.

Instructions for Installation and Usage

Installation

1. **Prepare Your Workspace:** Ensure your workspace is clean, welllit, and free from distractions.
2. **Select the Appropriate Die:** Choose the Redding Seating Die compatible with your cartridge.
3. **Remove Original Seat Plug:** Unscrew and remove the original seat plug from the die carefully.
4. **Install the Micrometer:**
 - Align the Redding Flat Bullet Seating Micrometer with the die opening.
 - Screw in the micrometer securely, ensuring it is properly seated.

Usage

1. **Adjusting Seating Depth:**
 - Turn the micrometer knob to set the desired bullet seating depth.
 - Make small adjustments and check the seating depth frequently.
 - Use a caliper to measure the overall cartridge length for accuracy.
2. **Loading Cartridges:**
 - Insert the bullet into the case and raise the ram to seat the bullet.
 - Ensure the bullet is seated correctly before removing the cartridge from the die.
3. **Finishing Up:**
 - After use, remove the micrometer from the die and clean it to prevent residue buildup.
 - Store the micrometer in its protective case for safekeeping.

Disposal Instructions

- Dispose of the micrometer in accordance with local regulations if it becomes unusable.
- Do not dispose of the micrometer in regular household waste.
- Check for recycling options or return programs offered by the manufacturer.

Contact Information for Further Support

For any inquiries regarding safety or product issues, please contact the manufacturer directly through their official communication channels. Ensure you have the product information available for reference.

By following these safety instructions, you can ensure a safer experience while using the Redding Flat Bullet Seating Micrometer. Thank you for your attention to safety.
