

UNTURNE 30 CALIBER BARRELS - SHILEN 30 CALIBER 1-10" TWIST UNTURNE BLANK CHROME MOLY BBL

[Gunsmith Tools](#) > [Barrel Tools](#) > [Barrel Blanks](#)

All the loving care of the best stock maker and the meticulous attention to detail of the master machinist will not make a gun shoot any straighter than the accuracy capability of the barrel used. And, it is the insides of a barrel, that very small and vital area of lands and grooves over which the gunsmith has no control, that can determine whether the finished work of art is for shooting - or "just for looks". Craftsmanship . . . not price . . . determines the quality of a barrel. But, by the same token, the customer willing to spend the money for a custom gun is shortsighted indeed, if he starts economizing and orders "just any old barrel so long as it's cheap". Furthermore, he is jeopardizing your reputation as a gun builder by making such a request. We, as your supplier, are laying our reputation (and yours, too!) on the line by offering you barrel blanks. They have got to be good or we are in trouble! Big trouble!! We must never sell you anything but that which will enlarge your stature with your trade. And, we feel that the Brownell's Barrel, made for us by Ed Shilen, will do just that! Shilen barrels, either chrome moly or Stainless, are rifled with six lands and grooves by the "Cold Forming" process using carbide dies made in Shilen's own plan under the most rigid controls. This rifling method achieves extremely close inside uniformity from breech to muzzle. Finished barrels are air-gauge inspected (air-gauged sensitivity is .00005" - five-one-hundred-thousandths!) and 6X borescope inspected. All barrels, .22 through .30 caliber have groove tolerances within .0005" and uniformity within .0003" No straightening is done, and all barrels are completely stress-relieved. All stainless steel barrels are hand lapped at the factory. Only those barrels passing all spec tests are offered to the trade. Any barrel even slightly "suspect" is started through the production process again and bored to a large caliber. In no other way can quality and reputation be maintained. Slightly more expensive to produce - but vastly greater in quality and ultimate performance.

Safety Instruction Guide for UNTURNED 30 Caliber Barrels

Introduction

Thank you for choosing the UNTURNED 30 Caliber Barrels manufactured by SHILEN. This guide provides essential safety instructions to ensure the safe use of your barrel, in compliance with the EU General Product Safety Regulation (GPSR). Please read and understand all instructions before using the product.

General Safety Guidelines

- Ensure that all firearms are handled responsibly and safely.
- Always treat every firearm as if it is loaded.
- Store barrels and firearms in a secure location, away from children and unauthorized users.
- Use the barrel only with compatible firearms to prevent accidents and injuries.
- Regularly inspect the barrel for any signs of wear or damage before use.
- Follow all local laws and regulations regarding firearms and ammunition.

Specific Safety Precautions for Use

- Always wear appropriate safety gear, including eye protection, when handling or using firearms.
- Do not exceed the recommended caliber specifications for your firearm.
- Ensure proper installation of the barrel according to the manufacturer's specifications.
- Avoid using damaged or suspect barrels; always report any concerns to a qualified gunsmith.
- Be aware of your surroundings when using firearms to prevent accidents and ensure the safety of others.
- Never point a firearm at anything you do not intend to shoot.

Instructions for Installation and Usage

1. Installation:

- Ensure the firearm is unloaded and pointed in a safe direction.
- Remove the existing barrel according to the firearm's manufacturer instructions.
- Carefully install the UNTURNED 30 Caliber Barrel, ensuring it is properly aligned and secured.
- Check for any gaps or misalignments before proceeding.

2. Usage:

- After installation, perform a function check to ensure the firearm operates correctly with the new barrel.
- Use only recommended ammunition for the 30 Caliber (.308) to maintain safety and performance.
- Clean the barrel regularly to maintain its condition and accuracy.
- If you experience any malfunctions, cease use immediately and consult a qualified gunsmith.

Disposal Instructions

- Dispose of any damaged or old barrels in accordance with local regulations.
- Do not discard barrels in regular household waste.
- Contact local waste management authorities for proper disposal methods.

Contact Information for Further Support

For any safety inquiries or concerns regarding this product, please contact your supplier or a qualified gunsmith. Always ensure that you are following the latest safety guidelines and regulations.

Thank you for prioritizing safety in your firearms handling. Enjoy your shooting experience with the UNTURNED 30 Caliber Barrels responsibly.
