Dillon SL900 Progressive Reloading Machine for Shotshells Safety Instructions

Introduction

Thank you for choosing the Dillon SL900 Progressive Reloading Machine for Shotshells. This guide provides essential safety instructions to ensure the safe and effective use of your reloading machine. Please read this document carefully before using the product.

General Safety Guidelines

- Always operate the reloading machine in a wellventilated area.
- Keep the work area clean and organized to prevent accidents.
- Ensure that all safety guards are in place before operating the machine.
- Do not wear loose clothing or jewelry that may get caught in moving parts.
- Always keep your hands and other body parts away from moving components.
- Use the machine only for its intended purpose as specified in this manual.
- Be aware of your surroundings and ensure that children and pets are kept at a safe distance while operating the machine.
- Regularly inspect the machine for any signs of wear or damage, and do not use it if any parts are damaged.

Specific Safety Precautions for Use

- Ensure that the Dillon SL900 is set up on a stable and secure surface to prevent tipping.
- Before starting the machine, doublecheck that all components are properly assembled.
- Do not overload the machine; follow the manufacturer's recommendations for the maximum load.
- Use only the appropriate cartridges specified for the Dillon SL900 (20 Gauge).
- When using the electric case feeder, ensure it is properly connected and functioning before operation.
- If you experience any unusual noises or malfunctions during operation, immediately stop using the machine and conduct a thorough inspection.
- Keep all materials, including powder and primers, stored safely and away from the machine when not in use.

Instructions for Installation and Usage

1. Installation:

- Unpack the Dillon SL900 and all components from the packaging.
- Place the machine on a sturdy, level workbench to ensure stability.
- Follow the assembly instructions in the user manual to properly set up the machine.
- Ensure that the electric case feeder is installed according to the manufacturer's guidelines if you are using it.

2. Usage:

- Before starting, ensure that all safety guards are in place.
- Load the appropriate AA hulls into the machine as per the loading instructions.
- Start the machine following the operational guidelines provided in the user manual.
- Monitor the operation closely and be prepared to stop the machine if necessary.
- After completing your reloading session, turn off the machine and unplug it if applicable.

Disposal Instructions

- Dispose of any unused or expired reloading materials according to local regulations.
- Recycle packaging materials where possible.
- For the machine itself, consult local electronic waste disposal guidelines to ensure safe and environmentally friendly disposal.

Contact Information for Further Support

For any inquiries regarding safety or technical support, please refer to the contact information provided in the product documentation or visit the manufacturer's website.

Thank you for prioritizing safety while using the Dillon SL900 Progressive Reloading Machine for Shotshells. By following these guidelines, you can ensure a safer and more efficient reloading experience.
