Dillon SL900 Progressive Reloading Machine for Shotshells Safety Instruction Guide

Introduction

Thank you for choosing the Dillon SL900 Progressive Reloading Machine for Shotshells. This guide provides essential safety instructions and guidelines to ensure the safe and effective use of your reloading machine. Please read and follow these instructions carefully to avoid hazards and ensure a safe reloading experience.

General Safety Guidelines

- Always read the instruction manual thoroughly before using the reloading machine.
- Keep the reloading machine out of reach of children and unauthorized users.
- Ensure that the work area is clean, welllit, and free from clutter.
- Wear appropriate safety gear, including safety glasses and hearing protection, while operating the machine.
- Do not use the machine if you are tired, under the influence of drugs or alcohol, or distracted.
- Regularly inspect the machine for any signs of wear or damage, and perform maintenance as necessary.
- Follow all local laws and regulations regarding reloading and ammunition.

Specific Safety Precautions for Use

- Only use the Dillon SL900 with 28 gauge shotshells as specified.
- Ensure that the machine is properly set up and adjusted before use.
- Do not overload the machine beyond its specified capacity.
- Keep hands and clothing away from moving parts while the machine is in operation.
- Do not attempt to modify or alter the machine in any way.
- If a malfunction occurs, stop using the machine immediately and consult the troubleshooting section of the manual.
- Always keep the work area free of any flammable materials when reloading.

Instructions for Installation and Usage

Installation

1. Choose a stable and secure surface for the reloading machine.
2. Ensure that the machine is level and securely anchored to prevent movement during operation.
3. If using a case feeder (not included), follow the manufacturer's instructions for installation.
4. Check that all components are present and in good condition before beginning setup.

Usage

1. Set the machine to the appropriate settings for 28 gauge shotshells.
2. Load the required components (hulls, primers, powder, and wads) into the machine as per the manual instructions.
3. Ensure that the case feed tube is filled with cases, and the machine is ready for operation.
4. Begin reloading by activating the machine, following the automatic indexing feature.
5. Monitor the reloading process closely and be prepared to stop the machine if any issues arise.
6. After reloading, clean the machine and the work area to remove any debris or residual materials.

Disposal Instructions

- Dispose of any unused or expired components (powder, primers, etc.) according to local regulations.

- Recycle packaging materials whenever possible.
- Do not dispose of hazardous materials in regular trash. Follow local guidelines for hazardous waste disposal.

Contact Information for Further Support

For any questions or concerns regarding the Dillon SL900 Progressive Reloading Machine, please refer to the manufacturer's website or contact their customer support for assistance. Always ensure that you are using the most current and accurate information regarding safety and operation.

By following these guidelines and instructions, you can ensure a safe and efficient experience with your Dillon SL900 Progressive Reloading Machine for Shotshells. Thank you for your attention to safety.
