

# Weatherby Mark V Primary - Straight Flat (PVD Black)

[Rifle Parts](#) > [Triggers Parts](#) > [Triggers](#)

## Material Details

1. 6061-T6 Aluminum (anodized)
2. Key Components: 440C Stainless Steel
3. PVD Black – PVD stands for Physical Vapour Deposition. It is a hard and durable coating that is applied to external stainless components to give them a clean black color.

## Description

Featuring TriggerTech's Frictionless Release Technology™, this drop-in trigger provides a true zero-creep break, extremely short over-travel and offers outstanding reliability, even in the harshest environments. Due to the exceptionally crisp break, most shooters report the pull weights feeling ~0.5 lbs lighter than a friction-based trigger of the same measured pull weight. Frictionless Release Technology™, along with hardened 440C stainless steel internal components ensure corrosion resistance and an extended service life. As Frictionless Release Technology™ does not rely on coating, polishing or lubricating the key engagement surfaces, trigger pulls will be more consistent from shot to shot and after thousands of shots more than you ever thought possible.
