[Rifle Parts](#) > [Triggers Parts](#) > [Performance Upgrade Kits](#)

The Ranger Point Henry Trigger Kit consists of a trigger and a spring.

The trigger alone reduces the trigger weight to about 3.5 lbs and makes the break much clearer. Only install the spring if you want a lighter, competitive trigger.

Note: Our testing of Henry 410 shotgun models resulted in a lighter than normal trigger from the factory, and our trigger alone reduced the trigger pull weight below 3 lbs.

Note: Our testing of the Henry Long Ranger rifles found that the LR rifles have a lighter spring from the factory, so no use of our spring is required. Our trigger breaks clear at 3.5 lbs.

INCLUDES: One trigger + one spring.

ADVANTAGES: Clearer, no distortion, plus lighter trigger pull weight (3-4 lbs reduction).

HENRY TRIGGER VARIATIONS: Please note: More than any other bolt action rifle manufacturer, the trigger pull weight of the Henry rifle varies from 4 lbs to 10 lbs. We can reduce it by a maximum of 3-4 lbs.

HENRY .410 REPEATING RIFLE: The trigger + spring reduce the trigger pull weight to under 3 lbs. (Caution when using both)

HENRY LONG RANGERS: Factory spring is lighter, so use only the trigger.

FITS: Henry Centerfire bolt action rifles in the following calibres: 45-70, 30-30, 360 Buckhammer, 410, 44 Mag, 45 Colt, 357 Mag, 38-55; also fits Long Ranger rifles

DOES NOT FIT: No Rimfire 22 LR rifles (these rifle parts are 100% unique to anything on a centrefire rifle)

## General Safety Guidelines

- Always handle firearms with care and follow standard firearm safety practices.
- Keep the trigger kit and all firearm components out of reach of children and unauthorized users.
- If you experience any difficulties or uncertainties regarding installation or usage, consult a qualified gunsmith.

## Specific Safety Precautions for Use

- **Trigger Weight Reduction:** The Henry Trigger Kit is designed to reduce the trigger weight. Be aware that a lighter trigger can lead to unintentional discharge if not handled carefully.
- **Installation of Spring:** Only install the spring if you desire a lighter, competitive trigger. If unsure, consult with a professional.
- **Testing:** After installation, test the trigger functionality in a safe environment to ensure it operates as expected.
- **Factory Variations:** Note that factory trigger weights may vary. Always verify the trigger pull weight after installation.
- **Caution with .410 Repeating Rifle:** When using both the trigger and spring, be cautious as the trigger pull weight can drop below 3 lbs, increasing the risk of accidental discharge.
