

Teiwaz Hybrid 1x20mm Micro Red Dot

[Optics & Mounting](#) > [Electronic Sights](#) > [Red Dot Sights](#)

The Wolfskrieger Teiwaz Hybrid Enclosed Pistol Red Dot was developed together with professional end users who demanded a handgun optic that performs in real operational environments - not just on the range. The red dot was developed together with military end users and has been tested and refined in the field for more than two years before being brought to market. The goal was simple: build a red dot that performs no matter what.

Unlike open-emitter pistol optics, the Teiwaz Hybrid uses a fully enclosed emitter system, protecting the diode from rain, dust, carbon residue, and environmental debris. Even in harsh conditions where open systems can become obstructed, the optic continues to function. For duty and defensive applications, this level of protection is critical.

The housing is precision milled from 7075 aluminum, not cast, ensuring superior structural strength and tight tolerances under recoil. Optical performance is driven by a premium aspheric glass lens, delivering exceptional clarity with minimal distortion and a clean, natural sight picture. The optic features a true multi-reticle system, allowing the shooter to select:

- 0.5 MIL dot (approx. 2 MOA)
- 15 MIL circle (approx. 52 MOA)
- Dot + circle combination

All reticle geometry and adjustments follow a professional MIL standard. Windage and elevation adjustments are 0.25 MIL per click, with a total adjustment range of 30 MIL, providing intuitive and consistent zeroing.

Brightness is controlled through 12 settings, including two dedicated night vision modes, carefully tuned to work properly with modern Gen3 tubes - an area where many optics still fall short.

Power comes from a standard CR2032 battery delivering up to 50,000 hours of runtime, supported by a high-efficiency solar panel and an internal capacitor backup. Even with a depleted battery, the optic can continue operating to an extent when ambient light is available or not.

Motion activation, automatic shutoff, and memory mode ensure the optic wakes up ready in your last-used configuration without unnecessary battery drain.

A defining ergonomic feature is the optionally integrated rear backup sight, designed to work with suppressor-height front sights. This allows the Teiwaz Hybrid to replace your existing rear sight, enabling the optic to be mounted further back on the slide. By moving the optic rearward, the shooter gains a noticeably improved field of view and a more natural presentation. The result is faster target acquisition and a cleaner visual window during recoil and transitions. Built around the widely adopted Shield RMSc footprint, the Teiwaz Hybrid integrates directly with modern optic-ready pistols. The package includes a Glock MOS adapter plate, a 1-degree shim plate, and an additional MOS-to-DPP adapter, as well as various screws for different firearms, ensuring broad compatibility out of the box.

Safety Instruction Guide for Teiwaz Hybrid 1x20mm Micro Red Dot

Introduction

Thank you for choosing the Teiwaz Hybrid 1x20mm Micro Red Dot. This guide provides essential safety instructions and guidelines to ensure the safe and effective use of your product. Please read this guide carefully before using the red dot sight.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose.
- Keep the product out of reach of children and unauthorized users.
- Regularly inspect the product for any signs of damage or wear.
- Report any unsafe conditions or accidents to the appropriate authorities.
- Check for recall updates on the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Do not expose the red dot sight to extreme temperatures or harsh environmental conditions that may affect its performance.
- Ensure that the optic is properly mounted to the firearm before use. A loose or improperly mounted optic can lead to misalignment or detachment during operation.
- Avoid using the product if it shows any signs of damage, such as cracks or malfunctioning components.
- Use the product in accordance with the manufacturer's instructions and recommendations.
- Be aware of your surroundings and ensure a safe shooting environment at all times.

Instructions for Installation and Usage

Installation

1. Mounting the Optic:

- Ensure that your firearm is unloaded and pointed in a safe direction.
- Remove any existing rear sights if necessary.
- Align the Teiwaz Hybrid with the mounting plate on your firearm.
- Secure the optic using the provided screws, ensuring a tight fit to prevent movement during use.

2. Adjusting the Reticle:

- Turn on the optic using the designated power button.
- Adjust the brightness settings according to your preference and environmental conditions.
- Select your desired reticle configuration using the multireticle system.

3. Zeroing the Sight:

- At a safe shooting distance, fire a group of shots to establish a baseline.
- Adjust the windage and elevation settings in increments of 0.25 MIL per click until your point of impact aligns with your point of aim.

Usage

- Always wear appropriate eye protection when using firearms.
- Be familiar with the operation of your firearm and the Teiwaz Hybrid before engaging in live fire.

- Practice safe firearm handling and follow all local laws and regulations.

Disposal Instructions

- Dispose of the product in accordance with local regulations for electronic waste.
- Remove the battery before disposal and recycle it according to local battery recycling guidelines.
- Do not dispose of the product in regular household waste.

Contact Information for Further Support

For any safety inquiries, product support, or further assistance, please refer to the manufacturer's website or contact your local distributor.

Thank you for prioritizing safety while using the Teiwaz Hybrid 1x20mm Micro Red Dot. Your attention to these guidelines will help ensure a safe and enjoyable experience.
